Introduction

This is the fifth iteration of a grades and grading practices publication by AACRAO. The previous versions in 1971, 1982, 1992, and 2004 were produced in a book for purchase format. AACRAO has decided to release this and future versions as a report free to all members.

The 2017 edition contains the data from two surveys: one on graduate and/or professional level grading practices and another on undergraduate practices. The surveys were reviewed and modified through the input of the AACRAO research advisor, board members, and other internal experts. This review led to significant changes in question design, including breaking previous complex questions into multiple questions. In addition, the categorical response choice of “other” was added to several questions followed by the ability to clarify the “other” response and/or practice. We also added the ability to select multiple responses for many questions where other iterations of the surveys were limited to mostly single categorical responses.

The surveys were distributed electronically to AACRAO member institutions in the United States. We received 661 responses at the undergraduate level and 306 at the graduate and professional level.

General Findings

In general, grading practices appear to be stable over time. In the aggregate, practices do not vary considerably based on institutional characteristics. However, when practices do vary, they are most likely to vary between institutional control (i.e., public vs. private) or institutional type (i.e., lower division only compared to a comprehensive undergraduate institution). In addition, a few institutions still report that their grading practices vary by school or college within the institution, but, for the most part, grading practices are set at the institutional level.

That being said, the details of grading practice are quite varied. Respondents provided a great deal of additional information about more than half of the practices.

Data

This next section contains the aggregate data and general comparative discussion for each question for both undergraduate and graduate grading practices. Disaggregated data by institutional type, size, and control is reported in Appendix A and B respectively and discussed here as needed.

The results are presented in the order in which the questions were asked in the surveys. Additional comments about practice have been reported as aggregated themed responses or individual practice comments as applicable. Data comparisons are also made between current practice and past practice where the questions were asked in an equivalent manner.
Grading System

Similar to the 2004 survey, a series of questions were proffered about the academic calendar, the grading system, the use of plus and minus grades, the use of withdrawal failing/passing and the practices around credit earned through alternative assessments including transfer, credit for prior learning, testing, and study abroad. This survey also introduced the practice of competency-based education (CBE) and how CBE is addressed on the transcript.

Academic Calendar

**Question:** What type of academic calendar is currently in use by your institution for credit-bearing classes? (check all that apply)

**Definitions:**

<table>
<thead>
<tr>
<th>Calendar System</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester</td>
<td>A calendar system that consists of two sessions called semesters during the academic year with about 15 weeks for each semester of instruction. There may be an additional summer session.</td>
</tr>
<tr>
<td>Quarter</td>
<td>A calendar system in which the academic year consists of 3 sessions called quarters of about 12 weeks each. The range may be from 10 to 15 weeks as defined by the institution. There may be an additional quarter in the summer.</td>
</tr>
<tr>
<td>Trimester</td>
<td>An academic year consisting of 3 terms of about 15 weeks each.</td>
</tr>
<tr>
<td>4-1-4 or 4-4-1</td>
<td>The 4-1-4 calendar usually consists of 4 courses taken for 4 months, 1 course taken for 1 month, and 4 courses taken for 4 months. There may be an additional summer session.</td>
</tr>
<tr>
<td>Continuous</td>
<td>A calendar system classification that is used by institutions that allow students to enroll/start classes at any time during the year. For example, a cosmetology school or a word processing school might allow students to enroll and begin studies at various times, with no requirement that classes begin on a certain date.</td>
</tr>
</tbody>
</table>

Source: nces.ed.gov

Unlike the previous iterations of this survey and IPEDS reporting system, this question was configured to allow respondents to select all of the academic calendar systems that were in use at their institution, not just the predominant calendar. As such a direct comparison of data is not feasible. In addition, in the 1992 survey the semester calendar category was further differentiated between early semester (fall ends before Christmas) and traditional semester (break at Christmas with completion of fall semester after the break). This language changed in 2004 and remains a single category semester in this report as well. In the current sample, the semester-based academic calendar remains the most common academic calendar system reported by U.S. institutions. Similar data is also collected through the IPEDS survey. Eight percent of undergraduate institutions reported more than one active calendar system and 12% of graduate and/or professional reported the same. Other academic calendars include a “D” plan which is reported as similar to a quarter system, 10-month calendars, two six-month terms, and various short intersession offerings between regular semesters.
**Grading and Competency-Based Education**

**Questions:** Does your institution offer competency-based education courses for credit? AND Does your institution issue grades for any credit-bearing competency-based education courses?

Two questions about competency-based education (CBE) are new for this survey; we asked these questions because some institutions convert CBE into standard grades. Sixteen percent of undergraduate institutions and 13% of graduate offer CBE. Undergraduate and graduate practices are similarly represented on this topic with almost three quarters of institutions offering CBE ultimately converting the CBE to a standard grade on the official transcript.

![Undergraduate Use of CBE](image1)

- Yes, and the grade IS included on the official transcript: 63%
- Yes, but the grade is NOT included on the official transcript: 29%
- No: 9%

![Graduate and/or Professional Use of CBE](image2)

- Yes, and the grade IS included on the official transcript: 66%
- Yes, but the grade is NOT included on the official transcript: 29%
- No: 5%
**Official Transcript Grading Systems**

**Questions:** Which of the following official transcript grading systems are in use at your institution for credit-bearing classes? (check all that apply) AND Does your institution automatically add a grade (letter or numeric) to the narrative on a transcript OR must a student request that a grade be added to his/her transcript?

The grading system categories extended in this survey differed from previous surveys because of observed grading practices. The categories were expanded to include “pass/fail,” “satisfactory/unsatisfactory,” “credit/no credit,” and “other.” In comparison, the 2004 survey used the following categories:

- Letter only
- Letter with pluses or minuses
- Letter with pluses and minuses
- Narrative only
- Narrative in addition to letter or numeric
- Numeric grades only

The pass/fail and similar categories were included in the other versions as part of the student grading options section. This survey also collected data in a similar manner on this topic and will address it in detail further on in the report.

The use of plus and minus grades appears to have increased over time starting with the 1982 data when 24% reported using “letters with (+) (-)” to nearly 70% now at both the undergraduate and graduate level. Among those who use narrative grades, 60% of the undergraduate institutions automatically add a grade (letter or numeric) in addition to the narrative on the official transcript; 20% of graduate institutions report the same practice. The use of numeric grades also appears to have increased slightly over time.

### Undergraduate Transcript Grading System

- **Letter:** 97%
- **Pluses:** 64%
- **Pass/fail:** 63%
- **Minuses:** 63%
- **Credit/no credit:** 40%
- **Satisfactory/unsatisfactory:** 37%
- **Other institutional option equivalent to pass/fail:** 10%
- **Numeric (e.g., 94%, 80%, etc.):** 4%
- **Narrative:** 1%
- **Narrative ONLY:** 0%
Additional undergraduate grading system practices are below:

- “XYZ is a public college, designated the residential liberal arts honors college of the State University System of Florida by the state legislature in July 2001. XYZ College does not assign letter grades or calculate grade point averages for degree-seeking undergraduate students. Only those educational activities completed satisfactorily are recorded on the official transcript: courses, labs, tutorials, internships, independent study projects, and independent reading projects. Each full-term educational activity completed satisfactorily in a 14-week term and each satisfactorily completed January ISP carries the equivalent of four semester credit hours. An activity satisfactorily completed as a module (half of a term), or modular equivalent, carries the equivalent of two semester credit hours. A satisfactory assessment indicates substantial effort, productivity, and progress. The underlying assumption is that New College students perform well, not just adequately. XYZ College’s academic program focuses on demonstrated competence rather than on the compilation of credits and grades. At the conclusion of each term, students receive an assessment of their performance followed by a narrative evaluation from the faculty member overseeing each educational activity. Evaluations are not intended as substitutes for grades and are never converted to grades. The narrative portion of the evaluation is a personal communication between the professor and the student. Beginning with the fall 2016 incoming student cohort, narrative evaluations may be provided as a component of the official transcript, at the request of the student. Students who first entered New College prior to fall 2016 are responsible for providing narrative evaluations separately from the official transcript, if needed.”

- “The letter grades we use are A, AB, B, BC, C, CD, D, and F. No pluses and minuses.”

- “We are going through a major change of deciding to possibly do away with the "Y's". Faculty is not using correctly and did not understand it is in the student's GPA as an "F".

---

Graduate practice comments include:
• “Only four of the health profession colleges use number grades; all others use letter grades. However, starting with the fall of 2018, we will be moving to letter grades for all of our colleges.”
• “Our professional schools (medical & pharmacy) currently utilize pass/fail/honor grades, whereby honor grades require both student performance excellence in the classroom combined with a standardized testing at a particular score level (cut line differs depending on subject). Our pharmacy school is considering moving to traditional grades, but hasn't yet formalized that decision.”
Use of Plus and Minus in Grading

Questions: Are faculty required to use pluses in their courses if earned by a student? AND Are faculty required to use minuses in their courses if earned by a student?

These questions are new for the 2017 survey and were added based on observing several institutions where factors varied in determining the use of plus and minus grades. Among the institutions who have plus and/or minus grades available in their grading system, the use of both are optional and left up to the individual faculty member at more than half.

One institution indicated that the plus/minus grading system is being phased out at their institution. Others specified that the practice varies by college and/or departments. Another noted that faculty submit numeric grades online, which are translated to letter grades including plus or minus by the student information system. Other undergraduate practices around plus and minus grading include:

- “The + and - indicators on grades have no mathematical weight. The faculty and administration are voting to change that for next year by assigning weights to those indicators which will change the grade scale.”
- “We are in the process of adding minus grades, but they have not been fully approved yet.”
“There is a lot of debate here about whether or not our policy "requires" the faculty to use +/- . I answered your radio button questions, but it doesn't really capture it all.”

“Our A+ earns 4.3 points, but there is discussion about possibly changing it to 4.0 (same as A).”

At the graduate level, the practice also varies by department or college. At one institution, if a faculty member uses plus grades, they must also use minus grades. Another noted, “There was discussion a few years back about adding pluses and minuses, but, since we are part of a larger university, the idea was shut down by the athletic department.”
Withdrawal Failing and Withdrawal Passing in Final Grading and/or on an Official Transcript

**Question:** Does your institution differentiate between "withdrawal failing" and "withdrawal passing" *in final grading*? AND Does your institution differentiate between "withdrawal failing" and "withdrawal passing" *(WP?)* on a student’s *official transcript*?

The 1971, 1982, and 1992 surveys asked about the institution’s failing grade policy and how that policy impacted the recording of said grade on the official transcript and calculation in the GPA. The question was not asked in either the 2004 or 2017 survey. The reason for doing so has not been retained. However, a viable hypothesis for this choice is that the practice around failing grades had not changed significantly between 1971 and 1992 so the question was thought not to have added value to our understanding of grading practices.

Instead for the 2017 survey the question evolved to one around whether or not an institution differentiated between withdrawal passing and withdrawal failing. This differentiation was an observed practice at institutions, so a data point was sought on the topic in this survey. In the aggregate about three-quarters do not differentiate between withdrawal failing and withdrawal passing in either final grading or on an official transcript. At the undergraduate level, lower division only, public and larger institutions are less likely to differentiate than others.

Other comments submitted on withdrawal grading practices include:

- “After the 60% point in the semester, individual course withdrawals are marked with a "WU" grade (Withdrawal- Unsatisfactory) that does not affect GPA. Before the 60% point in time, the grade is simply "W" (not indicating satisfactory or unsatisfactory).”
- “We have recently instituted a withdrawal policy. Students are assigned WD grades for the first 6 individual drops from classes. These do not impact GPA. The seventh drop is given a WFL and counts as a fail. This is to discourage students from dropping. Withdrawals from the term are exempted.”
- “Although we do not distinguish between Withdraw Pass and Withdraw Fail during the withdraw period (first 9 weeks), students who withdraw from a course after the 9th week are assigned a Withdraw Failing grade.”
- “We only have one W grade—neither passing nor failing. WF grade has not been used since the late 1970s.”
• “If a student stops attending classes, but does not drop/withdraw from the course, they receive a failing grade.”

We asked the graduate sample, but not the undergraduate sample, whether or not a withdrawal failing grade impacts the GPA. Almost three-quarters (64%) responded “Yes.”
Use of 4.0 Grading Scale

**Question:** Does your institution use a 4.0 grade point scale? AND What is the highest cumulative grade point average a student can earn?

In the aggregate, the data collected on the use of a 4.0 grade point scale has not changed significantly since 1982. Among those institutions that use a 4.0 grading scale, in almost all (99% UG and 97% GR) a 4.0 is the highest GPA a student can earn. For the few who have a grade point scale that extends beyond 4.0, the most common upper limit reported at either student level is 4.33. Just one graduate level institution reported no upper limit to the GPA.

One respondent clarified, “Note that while we use a numeric grading system, it is a 4.0 system rather than a percentage system as given in the example.”

Transfer Grades and the Cumulative GPA

Undergraduate use of 4.0 Grading Scale

- Yes, we use a 4.0 grade point scale
- We have a grading scale but do not assign numeric grade points to letter grades
- No, we use a grading scale but use a different range.

Graduate and/or Professional use of 4.0 Grading Scale

- Yes, we use a 4.0 grade point scale
- We have a grading scale but do not assign numeric grade points to letter grades
- No, we use a grading scale but use a different range.
Question: Are grades from transfer courses factored into the cumulative GPA at your institution?

* Institutions that indicated they do not accept transfer credit were excluded from these calculations.

In 1982, 1992, and 2004 the percentage of institutions that did not use transfer grades in the GPA were 28%, 19%, and 16% respectively. The cause for this change in practice over 30 years (i.e., an increase in the percentage of institutions that use transfer grades in the cumulative GPA) is unknown. The 2017 data shows about the same percentage—when viewed in the aggregate— as the 2004 data. None of the private, proprietary institutions in this sample count transfer grades in the GPA at either the undergraduate or graduate level. However, public institutions are slightly more likely than private, not-for-profit to do so.

Respondents provided additional language to explain their undergraduate transfer grades practice.

- “I indicated that transfer credit, test credit, and study abroad credit are included in our cumulative GPA. Note that we also have a university GPA that excludes them. There are minimum cumulative and university GPAs required for graduation.”
- “Transfer work does not count in the GPA unless the course was taken at another UC campus. Then that work is brought in as transfer work and does count in the student's GPA.”
- “Grades for transfer courses are only included in the GPA if the course is taken after a student matriculates. We do not include grades for courses taken prior.”
- We utilize all student grades (repeats included) from all of the student's institutions.
- “Consortium grades are calculated into students' GPAs (i.e., when our students take a course at a Consortium school, we count the course towards their institutional credits/GPA).”
The 2017 survey further differentiated transfer courses and the GPA to include questions about study abroad credit, credit for prior learning, and credit earned by a testing process.
Study Abroad Grades and the Cumulative GPA

**Question:** Are grades from study abroad programs factored into the cumulative GPA at your institution?
* Institutions that indicated they do not accept transfer credit were excluded from these calculations.

This iteration of the survey was the first to ask a question related to study abroad programs. On the whole, the results reflect a near equal split in practice. However, at the undergraduate level, lower division only and undergraduate institutions are less likely than comprehensive undergraduate institutions to count study abroad grades in the cumulative GPA. At the graduate level, this difference appears to exist by institutional control rather than type. That is, private, proprietary institutions are much less likely than others to count the grades in the institution’s cumulative GPA. The sample size is small (n=6) for that institutional control at the graduate level so the results are not representative.

Below are additional comments about undergraduate study abroad practices.
- “For courses taken on study abroad, grades are included in the GPA for students who attend a partner institution. Grades are not averaged into the GPA for courses taken through external providers. Students may repeat courses, and all grades are averaged into the GPA.”
- “We include grades in our study abroad programs in the student’s GPA, but not grades for other study abroad programs.”
- “We only have semester study abroad programs at the undergraduate level.”
- “We do have UF approved study abroad courses for UF credit; however, the majority of study abroad is transfer credit.”
- “Regarding grades for study abroad programs, grades will factor into the GPA for students who take University-sponsored study abroad programs. Grades will NOT factor into the GPA for programs that are sponsored by another institution.”
- “If the student takes a study abroad program sponsored/offered/taught by our institution, then the grades count as resident credit. If it is a 3rd party institution, then it counts as transfer credit (no grades = it comes in as a "T").”
A single comment was submitted regarding graduate practice on this topic.

- “Regarding the study abroad question, if the study abroad program is one of our affiliated programs and approved, the course may receive a grade. But this scenario has not occurred yet at the graduate and professional level.”
Prior Learning Assessments Grades and the Cumulative GPA

**Question:** If grades are assigned to prior learning assessments (PLA), are those grades factored into the cumulative GPA at your institution?

Like the previous question, this is the first time this topic has been included in the survey. The data represents only those institutions that assign grades for PLA. Those that do not assign grades are presumed to have skipped the question. Institutional size, type, control, and student level do not appear to have an influence on the practice.
Grades Earned through Testing and the Cumulative GPA

Question: If grades are assigned to credit earned through a testing process (e.g., Advanced Placement, challenge exam), are those grades factored into the cumulative GPA at your institution?

In the 2004 survey a question about credit earned through testing was asked in a different vein related to audited courses: “Can a student earn academic credit through examination for the audited course?” We did ask this question again, but also separated the concept of credit for testing as a separate category. In this year’s survey we focused on all credit earned through a testing process. Only those institutions who award grades for the credit-by-testing process were encouraged to respond to this question. Unlike traditional transfer credit, credit earned through a testing process is not likely to be counted in the cumulative GPA even when a grade is assigned. This is an interesting distinction given that it is assumed the credit is used to meet a graduation requirement just like credit earned from transfer—otherwise why would it be awarded in the first place? If this is in fact true, why are the two similar types of awarding credit treated differently when it comes to the cumulative institutional GPA? Unfortunately, the answer to this question was not garnered from this survey.

Undergraduate practice comments consisted of the following:

- “Test credit grades appear on the transcript, but they are in a "test credit" area that does not compute into the GPA.”
- “Local proficiency examinations given by academic departments DO count in the GPA; however, AP, CLEP, IB, DANTES, etc., do NOT count in the GPA.”
Graduate and/or Professional Credits by Testing and the Cumulative GPA

- Yes: 5%
- No: 95%
Grading Practices

This section focuses on grading choices for students around whether or not the institution offers pass/fail, satisfactory/unsatisfactory, credit/no-credit, or institutional equivalent. Only those institutions who selected these grading categories from the earlier question were asked about their student-centric practices for this topic.

Opt-in to Pass/Fail or Equivalent Grading

**Question:** Does your institution permit students to opt-in to take courses using your institution's pass/fail, satisfactory/unsatisfactory, credit/no-credit, or institutional equivalent grading option?

The percentage of institutions who offer a pass/fail or equivalent options to students has remained steady over time (63% in 1971, 59%, 1982; 52%, 1992; 61%, 2004, respectively) and 58% for undergraduate institutions and 47% for graduate institutions as of 2017. Public institutions are more likely than other types of institutions to make this option available to students. Very large institutions (20,000+ students) are also more likely than smaller institutions to do so, and lower division only institutions are half as likely as comprehensive institutions.

A few institutions provided clarifying comments about undergraduate practice.

- “Per the pass/fail policy, some courses are graded on a non-optional pass/fail only basis.”
- “Satisfactory/unsatisfactory is not a student option. Courses are approved to be graded only on a s/u basis. Grades below C (2.0) are unsatisfactory and are not included in the GPA.”
- “Credit/no credit option: NC does NOT count in GPA.”
- “Although students can petition, both the catalog and the s/u option application clearly state they cannot revert to a letter grade.”
• “Regarding undergraduate grading practices, satisfactory/unsatisfactory grades are temporary. Students cannot graduate with these grades, however, if a student requests an official transcript while still a student, s/u grades will show.”

One comment was submitted at the graduate level about pass/fail practice.

• “Pass/fail and satisfactory/unsatisfactory are different grade types at my institution. Graduates rarely enroll in courses on a pass/fail basis. S and u grades are temporary grades normally used when course work (largely research) extends beyond one semester. A final grade is recorded after completion of the course work.”
**Opt-in to Pass/Fail or Equivalent Grading Use to Meet Core Requirement**

**Question:** Can opt-in grading (pass/fail, etc.) be used to *meet a core requirement* in a student's major/program?

This year’s question combined two questions on the topic from the previous surveys. For example, in 2004 the two questions were “Are the courses that may be taken using [pass/fail] limited to elective courses?,” and “If you answered no [to Question 4.4], may the courses taken using the [pass/fail] grading option be used to satisfy requirements within the student’s major?” In 2004, 60% reported that pass/fail or equivalent was limited to just electives; this value is similar to 1992 and 1982. The percentage difference captured in 2017 could be attributable to the disaggregation of undergraduate (69%) and graduate (54%) practice, rather than any real change in the number of institutions with this practice. The combined question wording limits the ability to identify differences in practice over time on a direct basis. We did learn this time that 21% of undergraduate institutions vary this practice by major and/or program, as do 29% of graduate institutions.
**Opt-in Pass/Fail or Equivalent Limit Per Academic Calendar**

**Question:** How many *courses per academic calendar* year may a student opt-in to this grading choice? (pass/fail, satisfactory/unsatisfactory, credit/no-credit, or institutional equivalent grading option)

In previous surveys this question asked specifically about a pass/fail course option limit by “courses per term (quarter or semester).” Due to the fact that institutions may offer more than one type of term simultaneously, the wording was changed to “academic calendar year,” a more encompassing timeframe. The choice category “other” was also added this year and is the most selected choice at both education levels. As such, the data is not directly comparable over time. However, we did learn that there is a lot of variety in how this particular practice is applied across institutions.

![Pie chart showing Undergraduate Pass/Fail Limit per Academic Calendar]

Descriptions of what constitutes “other” were provided by respondents and key terms from that data include:

- Dependent on academic major or program
- Dependent on student level (e.g., junior, senior)
- Dependent on GPA
- Depends on the course
- Determined at the school level
- Limit to a fixed number of courses for the entire academic career, not academic year dependent
- Limit in number of credit hours, not courses
- Combination of academic career and academic term limits
- Limit set by percentage of program
- Limit per term with more allowed in summer than fall or spring
- “No limit,” but rarely allowed
- Combination of major and student status
At the graduate level, “other” responses were similar to those of the undergraduate respondents. Key terms include:

- Limit based on academic career, not academic calendar
- No specific policy because the practice is rare
- Credit limit, not course limit
- Dependent on program
**Opt-in Pass/Fail or Equivalent Limit Per Academic Career**

**Question:** How many courses per academic career may a student opt-in to this grading choice? (pass/fail, satisfactory/unsatisfactory, credit/no-credit, or institutional equivalent grading option)

As with the question about the course limit per academic year, this question was formatted differently than in previous years. The “other” choice category is also the most common for the limit of pass/fail courses per academic career. This question proffered limit categories (e.g., 1-3, 4-6, etc.) which are different from the previous surveys as well. Commentary added by respondents who selected “Other” at both student levels are similar to those provided to the academic year limit question.

By comparison, in 1982, the just 9% of undergraduate respondents allowed 1-3 courses per academic career and 40% between 4-6 courses. In 1992, those numbers were 14% and 36%, in 2004 17% and 335%, and in 2017 they are 16% and 18% respectively. The percentage of institutions that do not have a limit on the number of pass/fail courses per academic career has stayed basically stable.
**Lowest Numeric Grade to Earn Pass/Fail or Equivalent Credit**

**Question:** Please indicate the lowest numeric grade a student could receive and still earn a "pass," "credit," "satisfactory," or institutional equivalent for a course?

The sample size related to this question has been small over the series of surveys. As such, we are limited in the assumptions we can make about this practice. However, in general, it appears that the percentage of institutions who leave the decision up to the faculty member increased from 3% in 1982 to a high of 54% in 2004 and has declined to less than 50% for both undergraduate and graduate institutions. The other category includes “1.00 on a 4-point scale,” “1.67 or a C-,” “Students earn what the faculty normally use to award a C Grade,” and other similar responses.
Lowest Letter Grade to Earn Pass/Fail or Equivalent Credit

Please indicate the lowest letter grade a student could receive and still earn a pass, credit, satisfactory, or institutional equivalent for a course?

Although D- was not a selection in the survey, 42 undergraduate and 11 graduate respondents included this response in the “other” category. The two charts have been adjusted accordingly. However, this adjustment has not been made to the data differentiated by institutional size, type, and control in the related appendix tables. In addition, the 2004 survey included a category of “C or Above,” which was not included in the 2017, 1992, or 1982 survey. In the case of the 2004 survey, the “C or Above” response could include responses reported in this data set as “Other.”

At the undergraduate level, values in the “other” category include:
- Depends on program
- Different for pass/fail and credit/no credit options
- Differs based on student level
- More stringent for transfer course work
- Varies by major
- Varies by department
- Varies by course

Graduate and/or Professional Lowest Letter Grade for Pass/Fail

Graduate “other” practices varied between doctoral and master’s level, depends on the course, and B or B- grades.
Lowest Letter or Numeric Grade that Can be Applied Toward A Graduate Degree

**Question:** What is the lowest numeric grade that can be applied toward a graduate degree?

This is the first time this question has been asked, and it was only asked of the graduate and/or professional population. It will be asked of both populations in the future. Several respondents added D- to the open response to selecting “Other.” As such, the figure has been corrected to include D- in the list although it was not provided as a response choice in the survey.

Other comments added to the “other” response include a comment that “Students must earn a D, but a C or better for all required courses to continue,” “C- is lowest passing grade, but students can only count up to 3 points of C- toward a degree,” and “B or better at doctoral level; C or better for most certificates and master's level.”

The single response for “Other” included the following comment, “Student must earn what the faculty would normally use to award a C grade.”
Recording a Fail on Transcript if Minimum Letter or Numeric Grade is Not Earned in a Pass/Fail Class

Question: If a student does not earn the minimum letter or numeric grade to earn a pass, credit, satisfactory, or institutional equivalent, is the fail recorded on the student’s permanent record?

This question has been asked since the 1982 edition. In 1982 the percentage of institutions that did not record the grade at all was 13%, 7% in 1992, and 2% in 2004. After three decades of a decline in the practice, it appears that there might have been a slight uptick in the percentage who do not record, with 5% of undergraduate level and 7% of graduate and/or professional reporting doing so in 2017.

The percentage of institutions that both record the non-passing equivalent grade and count that the student’s GPA has increased over time (41% in 1982, 44% in 1992, 45% in 2004, and more than half in 2017).

Undergraduate Pass/Fail on Transcript if Minimum Not Met

- 5% Yes, and it is included in the cumulative GPA
- 39% Yes, but it is NOT included in the cumulative GPA
- 56% No

Graduate and/or Professional Pass/Fail on Transcript if Minimum Not Met

- 7% Yes, and it is included in the cumulative GPA
- 34% Yes, but it is NOT included in the cumulative GPA
- 59% No
Other undergraduate comments about pass/fail courses include:

- “Students who take a course pass/fail and earn a grade of D receive a grade of D on their transcript. Grades of C- or higher receive a P, and U grades receive a U. U is our failing grade.”
- “Our first-year students are graded pass/high pass/no credit in all classes taken in the first (fall) semester.”
- “You asked a question for which there was no answer applicable to us: "If a student does not earn the minimum letter or numeric grade to earn a pass, credit, satisfactory, or institutional equivalent is the fail recorded on the student's permanent record?" For our pass grading option, a C or higher is recorded as a PS; a D+, D, or F are recorded as the letter grade earned and calculated in the GPA (the student can choose this option). S/U grading is course specific and the student has no choice; neither grade calculates in the GPA.”
- “Pass/fail option: fail counts in the GPA.”
Auditing a Course

Question: Does your institution permit students to take courses on an audit basis? Definition: "Auditing is allowing a student's presence in the classroom without receiving academic credit, a pass/fail, or a letter grade."

The first time AACRAO asked about auditing a course was in 1992 when 93% offered audit as an option; of those, 84% recorded the audit on the transcript. In 2004, the percentage was nearly the same: 92% offered it, and 82% reported it on the transcript. This year, undergraduate practice remains about the same. However, the data looks different when disaggregated by student level. Just 82% of graduate and/or professional institutions offer an audit option, and only 66% record it on the transcript.
**Earn Credit through Testing in a Course Previously Audited**

**Question:** Can a student subsequently earn credit through a testing process for a course he or she audited?

This question was asked in the 1992, 2004, and 2017 surveys. In 1992 and 2017 a quarter of the institutions indicated they offered students an opportunity to convert an audited course to credit through a testing process. In 2004 13% said the same thing. Today, lower division only institutions are slightly more likely to allow a student to subsequently earn credit through a testing process for a course previously completed as an audit.

Undergraduate Credit by Testing for an Audited Course

- Yes: 16%
- No: 84%

Graduate and/or Professional Credit by Testing for an Audited Course

- Yes: 16%
- No: 84%
Option to Earn a Grade of Incomplete

Question: Does your institution allow students to earn a grade of incomplete (or institutional equivalent)?

The percentage of institutions who report offering an incomplete grade option has remained essentially stable since the 1982 survey.

Clarifying comment about undergraduate practices are listed here.

- “Policies regarding grading and incomplete grading deadlines are under consideration at this time.”
- Incomplete (I): During extraordinary circumstances (e.g., family/medical emergencies), students may request an incomplete mark from the instructor for project work that is near completion. To be eligible, student must have successfully passed all project assessments except the final assessment.”
**Conditions under Which an Incomplete May be Awarded**

**Question:** Check all of the conditions under which an incomplete may be awarded.

For this year’s survey we added additional response choices for the reasons in which a grade of incomplete may be awarded including an “Other” response with an open-ended text option. There was no distinguishable difference in practice by institutional size, type, and control.

Almost 90 institutions provided details to their “Other” practice reasons for awarding a grade of incomplete. These responses generally fell into the following categories:

- A percentage of course completion greater than 50% (e.g., 70%, 75%, 80%)
- Passing grade or better at the time of the incomplete grade
- Extraordinary circumstances (e.g., medical, emergency, death in family)

One respondent included “When there is a reasonable assumption that the student can successfully complete the course before the end of the next semester.”
At the graduate level, the details of the “Other” responses are similar to those at the undergraduate level. Additional reasons provided include:

- Provost approval
- Depends on school or program
- Course requires clinical hours not yet completed.
- It is typically for the last graded requirement.
- Reasons must be non-academic in nature, and student must be passing the course at the time the Incomplete is requested.
- Student petitions the Academic Standing Committee, but must have faculty approval first.
- Internship/rotation activity still in progress
**Deadline for Resolution of Incomplete**

**Question:** What is the deadline by which an incomplete must be resolved under ordinary circumstances?

The most common deadline now and in the past is during the next term. At both the undergraduate and graduate level “Other” deadlines included those by a set number of days after final exams, end of the term, or into the next term (e.g., 120, 30, 21, 42, 50, 60, 7, 90), specific dates (April 1, 15, November 1), specific number of months, midpoint of next term, and a date set by the faculty.
"X" Number of Weeks After the Subsequent Term Begins (UG)

Graduate and/or Professional Deadline for Resolution of Incomplete

- One academic year: 31%
- One calendar year: 16%
- "X" number of weeks after the term in which the incomplete was earned ends: 16%
- "X" number of weeks after the subsequent term begins: 14%
- At the end of the next term: 7%
- At the discretion of the faculty member who awarded the grade: 7%
- No deadline: 4%
- Other: 1%
One respondent commented on a recent change in practice at the graduate level.

- "We changed just recently the timeline of incomplete grade change from "within 14 calendar days after the final grade submission date" to "within 8 weeks of the beginning of next term."
Grade Recorded for Unresolved Incomplete

**Question:** If the incomplete is not resolved by the deadline, what is the permanent grade of record?

Although a trend was noted in the 2004 book noting that the percentage of institutions awarding a failing grade for an unresolved incomplete was increasing (68% in 1982 and 83% in 2004), this year appears to split the difference. This is another practice that does not notably differ by institutional characteristics.

One undergraduate institution commented, “Some colleges required graduating senior grades earlier than all other grades so confirmation of graduation can occur. This might be another layer to ask if there is a follow to the survey.” Another noted, “Our institution currently has over 10,000 grades of "IP" for students and alum. It should be standard practice at a national level that grades be solidified within a certain time frame, regardless if the course counts toward the graduating program.” Additionally, one stated, “Work-in-Progress (WIP) grades may be assigned for the first term, without effect to the GPA, of yearlong thesis courses until changed at completion of the thesis.”
Last Date to Discontinue a Course without a Record on Transcript

**Question:** From the options below, please select the last date in a term that most closely matches when a student may discontinue a full-term course without having it recorded on the official transcript?

The 2017 survey included more response choices than the 2004 survey, including the addition of an “Other” choice and a by “The ‘X’ day of the term.” Although the response choice “The ‘X’ day of the term. Please describe” was meant to encourage respondents to provide the day of the term, several listed a day of the term while selecting the “Other” response choice. That data has not been corrected for the figure below. Nonetheless, it is apparent from the data that the deadline for dropping a course varies considerably in U.S. higher education. At both the undergraduate and graduate level, many who selected “The ‘X’ day of the term” noted a day within the first couple of weeks of class. Others noted that the practice was based on a particular class meeting (e.g., second, fourth, etc.), before a percentage of the class or term, or by the end of a particular week in the term depending on the class; some stated “by census date” or something similar without explaining when that date is.

![Bar Chart: Undergraduate Last Date to Discontinue a Course without a Record on the Transcript]

- **36%** Through the end of the first full week of classes
- **27%** After the first class meeting
- **23%** The “X” day of the term
- **2%** At the end of the second full week of the term
- **1%** There is no point in the term when a student may discontinue a course without a notation in the permanent academic record.
- **11%** Other
Through the end of the first full week of classes: 34%
After the first class meeting: 2%
The "X" day of the term: 18%
At the end of the second full week of the term: 23%
There is no point in the term when a student may discontinue a course without a notation in the permanent academic record: 4%
Other: 19%
**Last Date for Faculty to Submit Final Grades**

**Questions:** Are faculty required to submit their final grades by a set deadline after the end of a full-term course? AND, from the options below, please select the date after the end of a full-term by which a faculty member must submit his/her final grades.

This was the first year that this question was asked of respondents. It was asked because of an almost universal adoption of online grading solutions compared to paper based process in years past. This will set a baseline for future surveys. Practically speaking, all of the responding institutions for both surveys require faculty to submit grades within a particular timeframe. Just 1% of graduate and/or professional institutions indicated they did not have a deadline for grade submission.

The surveys included “The ‘X’ day after the end of the term” and “Other” as response choices. However, quite a few respondents selected “Other” and then added a specific day to the commentary. As such, the response count for the two choices has been combined into one category “Other” for both undergraduate and graduate data. From the undergraduate data, final grading appears to be due within 1-5 days from the end of the term for many institutions (Appendix C). Similar data was recorded for graduate grading (Appendix D). However, the practice is still quite varied and can be tied to the length of the class, the last day of the term, the last day of finals, and business days vs. calendar days.

**Undergraduate Grading Deadline**

- 18%: Within one week from the last day of the term.
- 5%: Within a week after the last class meeting.
- 78%: Other

**Graduate and/or Professional Grading Deadline**

- 22%: Within one week from the last day of the term.
- 7%: Within a week after the last class meeting.
- 70%: Other
**Time Limit for Grade Changes**

**Question:** What is the time limit on final grade changes (other than incompletes)?

The response choices for this question were updated from previous versions of the survey and as such are not directly comparable over time. The data highlights a wide variety in practice on this topic as well. Although the most selected response choice was “No deadline” at the undergraduate level and “Other” at the graduate level, these response choices represented just 23% and 24% of institutional practice. Nearly a quarter of institutions in both sample sets selected “No deadline,” which is surprising from a policy and records management perspective. On the surface, it appears that the percentage of “No deadline” institutions has gone down from nearly 50% in 2004 to about a quarter today, however, it is unclear from the way the response choices were presented to the 2004 respondents whether that it is in fact the case. The response choices in 2004 included the following: “No Time Limit: Prior to Graduation,” “No Time Limit: Requires Approval,” and “No Time Limit: No stipulation.” Added together the totals equal 48% of responses for that survey.

Other undergraduate practices included (Appendix E):
- At the discretion of faculty
- Upon approval of the provost
- Each college/school may set its own deadline
- After 5 years, must have provost approval

Other practices are similar at the graduate level (Appendix F).

Course Repeats for Grade Improvement

Question: Are students able to repeat courses to improve a previously recorded grade?

Ninety-one percent (91%) of undergraduate and 80% of graduate and/or professional institutions allow students to repeat courses to improve a grade.

Question: Must a student submit a petition for a course grade to be replaced after the repeated course is successfully completed?

2017 was the first year that this question was proffered. Lower division only institutions are slightly more likely to make the grade changes automatically than other types of institutions. Institutions with more than 20,000 students are less likely than others to change the grade automatically.

Undergraduate Petition Required for Repeated Course Grade Change

- 13% Yes. A student must submit a request for the grade to be replaced.
- 87% No. We automatically adjust the grade as needed.

Graduate and/or Professional Petition Required for Repeated Course Grade Change

- 12% Yes. A student must submit a request for the grade to be replaced.
- 88% No. We automatically adjust the grade as needed.
**Question:** For the course repeat grading practices below, please indicate the practice and condition that most accurately describes repeat course grading at your institution.

This question was asked in a different format in previous years. The reason this question includes a matrix of answer choices is because of the previously observed variation in course repeat practices among our members which differ from the way the question was constructed in previous surveys. In particular, the repeat rules vary by type of course and as such would not be singularly true (i.e., the highest grade stands all the time). In the 2017 data, the number of respondents differs by response category, that is, each practice category should be viewed as a stand-alone data set. Averaging course grades for repeated courses is the least common practice; it is more likely for institutions to keep the most recent grade than the highest grade.

</table>
**Question:** May some courses be repeated for credit (i.e., count towards a degree requirement more than once)?

In 1992, no institutions allowed courses to be repeated for additional credit. In 2004, 7% indicated that their institution did allow courses to be repeated for credit and was similar to 1982. In 2017 the percentage that allows at least some courses to be repeated for credit has increased substantially with 72% of undergraduate institutions reporting doing so and 68% of graduate and/or professional institutions. This almost complete change in practice between previous surveys and now cannot be explained at this time. One could hypothesize that the wording of the question in each survey resulted in a different interpretation in the 2017 survey than other surveys. In 2004 the question read, “Do you allow additional graduation credit or a course repeated to better the grade?”

Previous surveys asked how many times a course could be repeated and provided categorical response choices. Those surveys did not ask if there were exceptions or other limits to repeated courses. Again, this year’s related survey question was modified to more accurately capture institutional practices as observed over time. As such, this year the related question was not seeking a count of the number of times a course could be repeated by as an open ended text response about the conditions under which a course could be repeated.

**Question:** Please describe the conditions under which a course may be repeated for credit.

The conditions under which a course may be repeated varies widely at both the undergraduate and graduate level (Appendix G and H). Some indicate that any course may be repeated, while others limit it to a type of course (e.g., music, art studio, practica, clinicals, and special topics).

Additional comments about undergraduate course repeat practice and policy were submitted by respondents and are listed here.

- “For the course repeat policy, if students earned a non-passing grade, they can repeat the course without petition. If they earned a passing grade, they must petition asking to repeat the course for credit and explain why.”
- “For repeat course policy, the two grades are averaged, but the student only receives 3 credits overall, not 6.”
“Students can only repeat a course graded D or U (not courses graded C- or higher).”
“Students that repeat a course with a C- or below can have the grade replaced 1 time.”
“We only allow students to repeat certain passed courses that don’t fall into the topics or experimental category. For two classes that are part of a sequence, we allow students to repeat the first course if their grade is below a 2.0, the assumption being that this would allow the student to be better prepared for the second half of the class. For example, Calc I can be repeated so the student has a better foundation for Calc II.”
“Students are only allowed to repeat courses in which they received a C- or below grade.”
“Grading on repeats is "second grade counts in cumulative." Others not on your list are true cumulative (everything) counts and first passing grade counts.”
“We are implementing a more stringent course repeat and academic forgiveness policy in Fall 2017, which is reflected in my answers.”
“There is a one-time grade replacement option; courses repeated more than once get calculated into the GPA.”
“There is forgiveness of F grades if the course is repeated and passed. The F no longer computes in the GPA, only the new grade.”
“We do not replace repeated courses grades. Generally, all grade points are calculated, but credit is earned only once, unless both grades are a C or better and the second attempt receives no grade points or earned hours.”
“Some courses carry a minimum grade requirement. Those courses may be repeated to earn the minimum grade. Both grades are used in the CGPA calculation, however. No grades are ever dropped from the GPA calculation.”
“Students may not repeat grades of C or higher just to earn a higher grade.”
“Students may retake the same course to improve the grade for that course. All instances are posted to the transcript; all grades factor into the students' GPA; no grades are averaged/replaced.”
“Students who retake a course with a C or better will have the grade averaged.”

A couple of graduate and/or professional institutions also clarified their repeat practice.
“Students can only repeat a course at the graduate level if an F or FA (failure due to absence) was earned. A course can only be repeated one time. Courses with a grade of C or higher cannot be repeated. Both courses will show on the student's academic record.”
“Student may repeat a failed course and pass, but grade stands for first attempt grade no adjustment is made.”
**Grading Policy**

We asked a series of questions related to grading policy of which just one was included in previous surveys, albeit in a different configuration.

**Question:** Who determines the grading policy at your institution? (check all that apply)

The 2017 survey asked respondents to select all applicable categorical responses, a different approach than in previous surveys. The decision to change the response format was based on observations in practice where more than one group or institutional entity influenced grading policy at the institution. At the undergraduate level, faculty governance groups have less involvement in setting grading policy than at undergraduate and comprehensive institutions. The larger the institution, the more likely a faculty governance group is involved. Conversely, at the graduate level, faculty governance groups are more highly engaged in grading policy than academic administration.

The response choice “Colleges or schools within the institution” was created with the intent to serve as a proxy for understanding if grading policy varies between colleges/schools rather than one grading policy at the institution level. In 1992 and 2004, about 4% of undergraduate level institutions reported grading variance by school or college within the institution compared to 12% today. This difference may be attributable to a change in practice, a sampling difference, or a difference in the way the question was worded.
Among the 9% of undergraduate institutions who selected “Other,” detailed responses included:

- Academic policy/standard committee/council
- Board of Regents
- State system
- Community college system
- Chancellor’s office
- Combination between college governance and state governing board
- Registrar

At the graduate level these comments included:

- Registrar
- Graduate council
- Subcommittee of academic senate in some cases
- Board of regents/governors
- Provost
- University governance process
- Curriculum committee
- State system chancellor’s office
- Policy recommended by faculty, but approved by the provost
- Senior leadership (academic and non-academic)
**Grade Dispute**

**Question:** Do students have an option to dispute earned grades?

This question is new for the 2017 survey. Virtually all institutions maintain some option for a student to dispute a grade and that policy is typically set at the institution level.

One noted very few issues around grading. “We spell out our grade appeal process on the student's grade page in the student dashboard at the end of every term indicating they have 30 days to appeal to their instructors. We actually have very few problems with grading.”
Grade Change Authority

Question: Who has authority to initiate a grade change? (check all that apply)

At the undergraduate level, undergraduate only institutions are less likely than other institutional types to let department chairs, academic administrators, or the registrar initiate a grade change. Authority primarily resides with the course instructor. The same can be said for private, not-for-profit institutions. Future surveys should include “the student” as a response choice.

Students, the grade appeal committee, and the retroactive drop committee were among the comments provided for the “other” response choice for undergraduate students.

At the graduate level a faculty arbitrator, the student, academic advisor, and the grade appeal board were included as “other.”
**Honor’s Course Grade Weighting**

**Question:** Are grades earned in honor’s courses weighted differently for the cumulative GPA than standard courses?

Those who selected “not applicable” as a response choice were removed from the data set. Interestingly, all participating institutions at both student levels weigh honor’s courses differently in the GPA from non-honors courses. One institution added, “We are considering honor’s courses, which would be denoted on transcript, but would not be weighted if we have sufficient participation.”
**Remedial Course Grade Weighting**

**Question:** Are grades earned in remedial courses weighted differently for the cumulative GPA than standard courses?

Similar to the previous question, “not applicable” response choices were excluded from the analysis. In contrast to honor’s courses, less than half of institutions at both student levels weigh remedial courses differently than regular courses. Private, not-for-profit institutions are more likely not to weigh them differently than public or provide proprietary institutions.

A comment was added to say the following about practice at one institution, “Remedial classes have their own GPA, not integrated into the student’s college-level undergraduate GPA. Student has 2 GPAs if they take remedial coursework prior to college level, but only the college-level GPA is factored for graduation.”
Conversion of Pass/Fail Grade to Standard Grade

**Question:** May a student petition for a pass/fail, satisfactory/unsatisfactory, credit/no credit, or institutional equivalent grade to be converted to a standard grade?

Public and comprehensive institutions are more likely to have an option for students to convert their grade, however, the percentage that do so is less than one-third.

Undergraduate Conversion of Pass/Fail to a Standard Grade
- Yes: 12%
- Conditional: 9%
- No: 79%

Graduate and/or Professional Conversion of Pass/Fail to a Standard Grade
- Yes: 10%
- Conditional: 12%
- No: 78%
Academic Bankruptcy and Forgiveness Policy

Several questions related to academic bankruptcy or forgiveness were part of the 2017 survey. Some of the questions are reworked from previous surveys to support disaggregated data collection related to practice, and others are new as of this survey.

**Question:** Does your institution have an academic bankruptcy or forgiveness policy?

This question was asked only of the undergraduate institution population. The responses are virtually unchanged from 2004.

**Undergraduate Academic Bankruptcy and Forgiveness Policy**

- Yes: 49%
- No, but the institution is considering one: 45%
- No: 6%

**Question:** Undergraduate students are eligible for the academic forgiveness or bankruptcy policy if they have . . . (check all that apply)

The 2004 data on the conditions for academic forgiveness is similar to that in 2017. Institutions also allow academic forgiveness for the following reasons (Appendix I):

- Change in academic program
- Age of courses
- Extenuating circumstances
- Age of courses plus grades in those courses
- Readmitted after academic dismissal
- Transferring between colleges

**Undergraduate Conditions for Academic Bankruptcy and Forgiveness**

- Not attended this institution for a set period of time: 63%
- Other: 30%
- Maintained good academic standing at this institution for a set period of time: 26%
- Not attended any other institution for a set period of time: 22%
- Reached a certain age: 3%
**Question:** Course grades granted academic forgiveness or bankruptcy are . . .

In 2004, 60% of the respondents noted that institutional practice was to “Keep all courses” (those from previous record not in cumulative totals). This year, the equivalent response choice yielded 89% of responses.

![Undergraduate Disposition of Grades Associated with Academic Bankruptcy](image)

Other practices include:

- Applies to transfer of credit only
- Changed from a F to a NP (no pass) grade; appears on the transcript
- Courses not designated on official transcript, but excluded from the program GPA
- Depends if refunded or academic withdraw
- Grades are converted to satisfactory/unsatisfactory so that they do not count in the GPA
- Grades are not changed/removed.
- Marked as Credit or No Credit
- Noted on the transcript, but left visible and still included in the cumulative GPA
- Only excluded for the manual recalculation of GPA for the purpose of graduation or admission to selective program
- Remain on record, but academic unit may forgive and allow student to return
- Remain on the record
- Visible, excluded, and cannot be considered
- “The Academic Fresh Start is a Texas program and was not described in its entirety in the space.”
- “Academic forgiveness is for previous college work at our institution and/or others. It essentially allows the student to be admitted to a program with no earned hours or GPA. We also have a transition semester policy for those who do poorly in their first semester. When approved, this retains the earned credit for grades C and above, but changes all grades to credit (A, B, C) or no credit (D, F).”
Question: The academic forgiveness or bankruptcy policy applies to . . .

Similar response choices were included in 2004, however, those choices were part of the previous question. Breaking the question into two parts for 2017 and modifying it removed the ability to directly compare results, but provided us with the ability to see additional details in practice. The most common practice is to apply the academic forgiveness rule to all of the courses within the bankruptcy period. This is the easiest policy to apply.

Other practices provided by respondents highlight a wide variety in practice, for example:

- “A student who has taken no courses for five or more consecutive years (absent from all formal education) may, prior to readmission, request an educational reprieve. The procedure permits retention of the previous credit from all courses in which grades of C- or better were earned, but the former cumulative GPA, although retained for informational purposes on the academic record, will not be used. A new GPA will be started upon readmission. Graduation honors will be based only on the restarted GPA, provided that a minimum of 64 graded semester hours have been completed at the university subsequent to the reprieve. The notation “educational reprieve” will be written on the student’s academic record.”
- “A student who is absent from the college for at least three (3) years, and who is readmitted and successfully completes the equivalent of at least two semesters of work on campus, may petition the Subcommittee on Academic Standards to have course credits toward graduation and cumulative grade point averages based only on work accomplished after the second matriculation. "Successful completion" will mean the attainment of at least a 2.00 average, or a higher probationary average, as stipulated by the committee.”
- “All courses n/a to new program of study.”
- “All courses within term(s) except for withdrawals.”
• All grade points are eliminated, but C or better grades earn degree credit.
• “All grades are removed from GPA, but students keep earned hours for courses with grades of C or better.”
• “All grades below C on the student’s official transcript”
• “Any Course with a D, F, or W.”
• “Any courses within an academic semester the student wishes to bankrupt.”
• “Applies to one or more semesters within which a student earned grades lower than a C. No courses taken during the semesters approved for academic forgiveness would apply toward requirements for a degree.”
• “Courses for which academic amnesty is sought, limited to 24 credits
• “Courses in which a grade of D or F was earned;”
• “Determined on a case by case basis.”
• “Failing grades with exceptions for D grades within the bankruptcy period of time.”
• “GPA is reset to zero, but courses with C or better grade will still count toward degree completion.”
• “Grades aren’t changed/removed.”
• “Grades below D+ and 5 years or older at the time of application; may only apply one time.”
• “Grade earned less than C-.”
• “Grades of A thru C are counted in EARNED credits only; students lose D grades. However, courses with a grade of C or better from those terms may be used to meet graduation requirements.”
• “Must have C or better to retain credit; all grades excluded from GPA calculation”
• “No more than 16 credits which the student selects; reviewed by Academic Affairs.”
• “No specified policy, but typically used for poor grades only.”
• “Number of courses only enough to regain good standing.”
• “Only courses below C to the point that the student has a 2.0 GPA.”
• “Only courses that do not apply to the new degree program.”
• “Specific courses as applied for.”
• “Students can choose forgiveness for one course or an entire semester of coursework.”
• “Students can choose up to 15 credits of below-C work.”
• “Students can request to save A, B, and P grades. All others are excluded.”
• “To be eligible for academic renewal, students must be away from the University for 5 calendar years. Upon return, students must earn C- or better in 12 credits. GPA is reset with the GPA for these 12 credits. All courses remain on the transcript. Credit for courses where the grade earned was C- or better may be counted toward the degree.”
• “The forgiveness wipes out all grades prior to the forgiveness being granted and treats all prior coursework as if it were transfer credit. Only grades of C- or better will earn credit, and all grades will be excluded from GPA calculation.”
Graduation Honors

This section of both surveys asked institutions about their graduation honors practices. At the recommendation of the AACRAO research advisory board and others, graduate and/or professional institutions were not asked about Latin honors as it was reported to be uncommon at that level.

At the undergraduate level, we also separated questions about Latin honors from other honors. That is, institutions who reported that their institution did not use Latin honors were prompted to respond to a question about other graduation honors.

**Question:** Has your institution made any significant changes in its graduation with honors requirements in the past five years?

Few have made significant changes to their graduation with honors requirements in the last 5 years, and these results mirror those from 2004.
Undergraduate Latin Graduation Honors

Question: Does your institution calculate and award Latin honors (e.g., "summa cum laude," "magna cum laude," etc.)

Eighty-one percent report using Latin honors. Lower division only institutions are much less likely than undergraduate only and comprehensive institutions to award Latin honors. Private, not-for-profit are more likely to use Latin honors than public or private proprietary institutions. In addition, the larger the institution, the more likely they are to use Latin honors.

Question: Which Latin honors are awarded at your institution? (check all that apply)

![Bar chart showing the percentage of institutions awarding each Latin honor: cum laude 99%, magna cum laude 100%, summa cum laude 99%, egregia cum laude 0%, maxima cum laude 0%]

Question: Does your institution use GPA, class rank, or both to determine Latin awards?

Nearly all (96%) use only the GPA to determine Latin awards, 2% use only class rank, and the other 2% use a combination of class rank and GPA. Others stated that the threshold for awards varies by college, school, or academic year. Maxima and egregia cum laude are not used very often. Just one respondent indicated a GPA requirement of 3.8 for maxima cum laude and one of 4.0 for egregia cum laude.
**Question:** Please indicate the GPA range within which a student can earn cum laude (e.g., 3.50-3.79).

In years prior, the response choices were categorical instead of open text. In the process of reviewing the draft survey for 2017, we received feedback that the categorical responses did not fit practice at their institution. It was this feedback that led us to leave the response as open text. After cleaning the data, the chart below summarizes the frequency of responses.

![Undergraduate GPA Range for Cum Laude](chart.png)

Among the few institutions who use a class ranking percentage to award Cum Laude, most report a minimum of being in the top 10% of their class with some as high as the top 20% of the class.

**Question:** Please indicate the GPA range within which a student can earn magna cum laude (e.g., 3.80 to 3.99).

![Undergraduate GPA Range for Magna Cum Laude](chart2.png)

The class ranking percentage reported for magna cum laude varied from the top 4% to top 20%.
**Question:** Please indicate the GPA range within which a student can earn summa cum laude (e.g., 4.0 -).

![Undergraduate GPA Range for Summa Cum Laude](chart)

Summa cum laude class ranking percentage ranged from the top 2% to 10%.
Undergraduate Graduation Honors (not Latin)

Question: Does your institution denote graduation with honors?

Of those institutions who do not award Latin honors, 78% offer an alternative. Lower division only institutions are more likely than others to offer this alternative to Latin honors as are public institutions. The determination on who receives this award may vary by college, by the composition of each graduating class, by school, by degree type, or, for at least one institution, by honors exam grades.

Question: Does your institution use GPA, class rank, or both to determine graduation honors awards?

Among the respondents, none use class rank only to award honors, 5% use both GPA and class rank, and 95% use only the GPA.

Question: Which graduation honors denotations does your institution award? (check all that apply)

Some respondents provided their nomenclature for other types of graduation honors including:

- Academic Distinction
- Academic Honors
- Chancellor's Honor
- Dean's List or President's Honor Medal
- Distinction (= highest honor)
- Distinction and Honors
- Distinction, high distinction, highest distinction
- Distinction, High Distinction, Highest Distinction; Departmental Honors; Hutton Honors College
- Graduated with Distinction
- Highest Distinction, High Distinction, Distinction, With Merit
- Honors College
- Honor’s, Dean’s and President’s honors
- Perfect attendance, A Average
- President and Vice-President Honor
- Presidential, 3.8 and Higher; Vice Presidential, 3.5 to 3.79
- Presidents and Deans
- President’s honors
- President's List, Academic Citation, Dean’s List
- With Distinction. and we will be starting a Honors Within Major in the fall

The conditional details of these honors are included in Appendix J.

No institutions provided a response to the following question from this section of the survey “Please indicate the GPA range within which a student can earn highest honors (e.g., 4.0 -)” and just four provided responses to “Please indicate the minimum percentage class rank within which a student can earn highest honors (e.g., 5%).” Those responses ranged from 2% to 10%.

**Question:** Please indicate the GPA range within which a student can earn high honors (e.g., 3.80 to 3.99).

[Chart showing Undergraduate GPA Range for High Honors]

- Count of GPA Range: 1, 1, 1, 1, 1, 1, 1, 1, 1, 1
**Question:** Please indicate the GPA range within which a student can earn honors (e.g., 3.50-3.79).

![Undergraduate GPA Range for Honors](chart)

Just four included percentages for honors, and they ranged from 10 to 20%.

Other undergraduate comments about honors award practices are:

- “All college-level coursework, regardless of institution, is counted in the calculation of Latin honors. Transfer coursework is not counted in the institution GPA used for graduation, but it is counted when calculating Latin honors.”
- “Honors also requires that students earn 30 or more credits at the college in addition to the GPA requirement.”
- “Students graduating from an Associate's program may graduate with honors with a CGPA of 3.5 or higher. Latin honors are not used—the diploma and transcript state "Honors Graduate."
- “For graduation with honors, all grades earned are included in calculations, including repeated courses. Even though repeated courses are not included in the cumulative GPA, for purposes of graduation with honors, the hours and grades of every instance of the course are included.”
- “Students must earn a minimum of 60 credits at our institution in order to receive Latin honors. Students who have earned fewer than 60 credits from our institution, but have a 3.5 or higher GPA will be awarded honorable mention.”
- “In addition to GPA, honors awards require that no credit-bearing course may be taken under the Satisfactory/Not Satisfactory option except COM1001 or equivalent, no incomplete grades may be considered, no grade may be lower than a C, and no course may be repeated.”
- “Minimum of 60 earned credits to be eligible for Latin honors.”
- “Honors are determined by class GPA which can change each year.”
- “Actually, Latin honors is awarded to the top 30% of the graduating class. Thus, GPA ranges change.”
• “Latin honors at graduation include transfer coursework.”
• “Latin honors also require a minimum of 90 credits in residence at our institution.”
• “We award graduation honors based on honors exams.”
• “Also, our Latin honors are based on a sliding scale depending on the number of hours completed at our institution. My answers reflect those GPA levels needed for a student completing a minimum of 94 credit hours through our institution. Those completing fewer credit hours need a higher GPA and are not eligible for summa. This is a policy of ours that I would personally like to see standardized sometime in the next few years.”
• “Graduation honors also include "Honors in the Major" based on a separate independent thesis with defense and other course and GPA requirements.”
• “4.00 earns the student the title of valedictorian, as well as summa cum laude.”
• 3.5-3.75 receive Dean’s List recognition on the transcript at the end of each semester.
• “3.75-4.0 receive President’s List recognition on the transcript at the end of each semester.”
• “Students who have a 3.75 or higher overall graduate "with honors recognition" on their transcript.”
• “We calculate all transfer credit and Mercer credit to determine Latin Honors.”
• “When determining Latin honors, we include grades for all transfer course work. The transfer work cannot help a student get honors, but can bring down their GPA.”
• “While there are no degree honors awarded, students may receive "Departmental Honors" for completing the honors program within their major.”
• “We add the transfer grades in the calculation of graduation honors, although not in the university GPA.”
• “The change most recently enacted regarding Latin honors is to count only the credits and grade points earned post-matriculation. Thus, we no longer count all transfer work into the cumulative GPA for Latin honors.”
• “Students must complete at least 60 credits in residence to qualify for academic honors at graduation. All credits earned as an undergraduate, including those taken as part of the academic forgiveness policy, are included in this calculation.”
• Mastered (M): student meets or exceeds the stated criteria for mastery of a project or competency area.”
• “Mastered with Distinction (MD): faculty may assign the mark of MD for student work that achieved a distinguished level of achievement.”
• “A student must have at least 60 graded credits to receive graduation honors.”
• “Latin honors are also contingent upon performance on our comprehensive examinations.”
• “Honors thresholds will change with the 2017 incoming class.”
• “In order for a student to receive university honors they must complete at least 60 letter-graded credits at the University.”
• “Our Latin honors GPA ranges recently changed to be based on schools. We find that GPA requirements in schools like Education put the majority of their students in cum laude, where top performers in Business or Engineering were rare to reach summa.”
• “We also grant Graduation with Distinction for those who are part of the Honors Program and complete all the requirements for that.”
• “President's Honor Roll is posted to the transcript with 15 credits earned with 4.0 fall and spring and 12 credits earned with 4.0 summer.”
• “We currently also require an honors project to be completed to be eligible for Latin honors. Our student government has put forth a bill requesting that the honors project be unlinked to the Latin honors. It is in the faculty governance process now.”
• “With distinction requires a GPA between 3.5 and 3.69.”
• “Dean's honor for term grade point average: freshmen must have a 3.0 GPA; sophomore/junior/senior, 3.250; and all students must have completed a minimum of 12 letter-graded units with no Incomplete grades and no grade in a course lower than a C-.”
• “Dean's List honors are awarded each academic semester an undergraduate student earns a 3.4 GPA and has completed at least 12 undergraduate course credits in the semester.”
• “Each degree-granting unit shall determine the appropriate GPA requirements for the three levels of recognition: distinction, high distinction, and highest distinction.”
• “Residency requirements: 46 of the last 60 credits must be taken in residence and 30 credits at the 300-400 level earned in residence are the minimum to graduate; 40 credits in residence are the minimum required to graduate with Latin honors.”
**Graduate Graduation Honors**

As noted earlier, the graduate and/or professional institution participants were only asked about honors in general and not about Latin honors. Results of the survey indicate we should have asked about Latin honors at the graduate level too.

**Question:** Does your institution denote graduation with honors? AND What nomenclature is used to denote graduation with honors at the graduate and/or professional level? (check all that apply)

More than half (58%) award some sort of graduation with honors and of those 51% use the nomenclature “with distinction.” The other 49% remarked that they denote honors using the following:

- Latin honors
- "Honors" noted on diploma and transcript
- Academic honors
- Academic honors for CGPA of 3.85 or better on a 4.0 scale
- Award both Latin honors and honors
- Beta Sigma Phi
- Distinction/high distinction and highest distinction
- Department or school honors
- Depends on the school (Law uses Latin honors; no other school has honors at the grad level)
- Graduate honors
- Highest honor, high honor, and honor
- Honors program graduate if applicable
- Not for graduate, but the professional schools have this concept
- President's honors
- With honors or with high honors

**Question:** Does your institution use GPA, class rank, or both to determine graduation honors awards?

Most use only the GPA (85%), 3% use class ranking only, and the remainder use a combination of class rank and GPA. None of the respondents provided additional practice details about the GPA and class rank used to award honors.

Additional comments about honors at graduation practice at the graduate and/or professional level are as follows:

- “Honors for graduation depend not only on GPA, but also on the results of comprehensive exams and oral exams (e.g., thesis defense).”
• “No particular standards exist for determining honors. The faculty vote each year on who receives honors.
• Only law calculates class rank.”

Q2.36 - For the course repeat grading practices below, please indicate the practice and condition that most accurately describes repeat course grading at your institution.

This was too complex of a matrix to create meaningful breakouts.
Q2.37 - May some courses be repeated for credit (i.e., count towards a degree requirement more than once)?

</table>
Approximately 3 weeks after term
At the end of the second week after finals week
Based on each term and academic calendar
By Monday at 10 a.m. on the week after finals
By the end of the 2nd work day after the end of the semester.
Depend on the quarter
Depends on how much time we have between terms
depends upon the term; for spring, it is immediately. For others, it is before the start of the next
due 72 hours after the final
Exams run M-F. Final grades for candidates are due on the following Monday or Tuesday depending on
finals end on Friday/Saturday. Grades are due on Tuesday.
First Tuesday after the conclusion of the last day of class.
First Tuesday following end of term
For fall term, it’s the end of the first week of January post winter break; for spring term it’s a few days
Fourth day after term ends
Generally around the 12th day after the last class meeting
Generally, 4 days after the end of the term. The exception is for graduating seniors in May, which is 12
Grad crs & Prof didactic crs are 1 wk after last day of term; clinical are within 45 days
Grades are due on Monday following the last final exam period the preceding Thurs.
Grades are due on the 5th day after the end of the term, by 9:00 am.
Graduating students must be graded within 24 hours of last day of finals. Other student grades required
It varies by term, but it is always 5-6 calendar days after the end of final exams.
it’s usually a couple of weeks after the last day of exams! Very generous
Jan 2 for fall; Friday after finals in May for Spring graduates and one week after finals for non-graduating
Last day of Block
Last day of the term
Module courses within our 15 week term, have seven days to enter grades. Courses that are 15 weeks
Monday
Monday
Monday after end of term
Monday after final exam week
Monday after finals week
Monday at 4pm following the last day of the term.
Must submit five days after their final exam.
Noon on the 2nd day after finals week.
one deadline, which is 48 hours after the last final exam
One week
roughly 4 weeks after the term
Second business day after finals.
Second day
Second working day after the end of the term.
Terms end on Saturday, grades are due the following Tuesday.
The day after the last final exams are given

Appeals are one semester following the grade assignment. An error in grade be changed beyond the
deadline as a decentralized institution, each school/college may set its own deadline. The shortest (Jacobs School)
At discretion of Dean
At due date we work with all faculty to complete prior to beginning the next term.
At faculty discretion, some colleges enforce college-level approval for grade changes after a certain date
At the 10th days when the new semester starts
At the approval of the Provost
At the discretion of the Academic Dean
At the discretion of the faculty member and approval of the Provost
At the end of the next term only with the approval of the Dean.
Before graduation
before student's record graduated
Can submit up to the incomplete deadline
could extend until student graduates
Currently no deadline but under review
depends on circumstances, e.g. if student appeal, clerical, if student has graduated - too complex to type
Depends on the semester and the rationale for the grade change. Most cases 30 days.
Discretion of Dean
Discretion of dept., dean and VP
Discretion of Provost and instructor
end of grading deadline unless an error occurred
errors only until end of next term; any other need to be due to extenuating circumstances & have
Faculty can correct a grade at any time. However grade appeals can only be submitted by students in the
Faculty discretion but not after graduation.
Four weeks after submission; later only with Dean's approval
Friday of week one of the next quarter
Generally at the end of the next term in residence.
Grade appeal is one term after completion
grades can be appealed within one year of the grade being issued
Has to go through an approval process
If an instructor made an error in reporting of the final grade, the instructor has 20 days into the following
If grade was in error, no deadline. Student has 6 weeks into the following semester to appeal a grade.
if has been longer than 1 year, check with provost
Independent study courses - exams graded within 5 days
Instructor of record has no limit when he/she may effect grade change. Policy covering student initiated
Mediados del proximo periodo
Midpoint of the next full semester
Mid-term of the next semester.
Must go through academic standing committee
no changes after degree awarded/posted
No deadline but any changes after 1 year must be approved by the respective college dean
No deadline but dean approval is required.
No deadline but generally within a year.
No deadline if an error is discovered
<p>| No deadline if error                                                                 |

Grades submitted to the Office of the Registrar are final unless an error was made in the calculation of the grade.

If submitted after one year the Associate Provost has to approve.

If the grade change is based on a miscalculation, there is no real limit although it should be within a 'reasonable' timeframe. It depends on the issue, but normally implemented with faculty member, to Dean, to Commander to Provost to University President if program complete; stops at School Dean/Commandant if program not complete.

No changes made after degree is awarded.

If the grade change is based on a miscalculation, there is no real limit although it should be within a 'reasonable' timeframe.

It depends on the reason for the change. If the faculty member discovers a grading error, there would be no limit. Other reasons are not allowed.

No changes made after degree is awarded.

not permitted

ONE ACADEMIC YEAR FOR ADMIN ERROR ONLY

One year, UNLESS the degree has been awarded.

one year; later changes require department head and university registrar approval.

Only with the approval of the dean

Routinely one year, although there is some faculty/dean discretion

six months

Six months after final grades are due for a semester

standard is one academic year, but with written explanation and approval by the dept chair, dean, and student has 30 days after grade posted to request a grade change.

Student has one quarter to refute a grade change, or if faculty realizes they made a grading error, with student initiated appeal within 2 weeks of final grade post; faculty can submit request at their discretion.

Students can appeal for a grade change 10 days business days at the start of fall for summer and start of spring semester for fall. 10 business days after grades are due for Spring. Thirty days into the following semester for I grades excluding summer and one academic year for IP grades.

three months

Two calendar years

Two semesters after the semester in which the grade was earned

UG is one year Graduate is 12 weeks

Until degree conferral

Usually, when final grades are submitted. Depends on possible extenuating circumstances.

varies by program

We would not allow any changes after the student's degree has been conferred.

Within 3 months of graduation (to correct errors)
Appendix G: Conditions for Repeating an Undergraduate Course*

*The table includes data as submitted by the respondents

<table>

<tr>
<td>Course is proposed and created to be repeatable for credit. Ensembles, lessons, practicum, internships, etc. fall under this category.</td>
<td></td>
</tr>
<tr>
<td>Course that are repeatable such as special topic courses with the same course number, but offered under different topics</td>
<td></td>
</tr>
<tr>
<td>Courses in which students may complete multiple times for credit such as PE, Music, Independent Study, Special Topics and Research</td>
<td></td>
</tr>
<tr>
<td>Courses like private music lessons or PE activities.</td>
<td></td>
</tr>
<tr>
<td>Courses need to be approved through curriculum to be repeatable.</td>
<td></td>
</tr>
</tbody>
</table>
Courses offering different topics; music ensembles and applied lessons.

Courses requested by the departments as repeated for credit from inception, upon approval of the Curriculum Board and Faculty Senate.

Courses such as applied music lessons, internships, research course numbers can be taken more than once. All but the lessons are variable credit.

Courses such as Internships, Music lessons, Ensembles, Chorus, and Theatre Labs may be repeated for credit.

Courses that are designated as repeatable for credit (i.e. internship hours, courses with variable titles, etc.)

Courses that are preapproved by faculty governance as repeatable only

Courses that are set up to be repeatable for additional credit.

Courses that are specified in curriculum as repeatable for credit - usually Music performance classes or Special Topics courses with different topics.

courses that are variable credit, offered for 3 hours one semester and 3 in another for example

Courses that have been approved by the faculty to be repeated - generally independent study, creative inquiry, etc.

Courses that require a minimum grade

Courses where the topics change may be repeated for credit.

Courses which are indicated in the catalog as repeatable may be taken more than once for credit toward a degree. Many times the course content changes.

Courses with A or B grades may not be repeated. Normally, courses with a C grade may not be repeated. Courses with D or F grades may be repeated once without written permission. In all cases, the original grade for the course and the grade for each repeat will appear on the transcript. The original grade will be calculated into the grade point average, unless the student initiates a request for Repeating a Course with Grade Point Average Recalculation as described below. Only one registration for the course counts toward the total number of credits required for graduation. A course cannot be repeated after receiving credit in a course for which the repeat course is a prerequisite.

Courses with credit by arrangement may be repeated for a pre-determined maximum credit limit as determined by the Curriculum Committee.

Courses with the same number but revolving topics. In these cases, the number of hours that may be applied toward degree completion are course specific.

Credit for varsity sports can be repeated for credit, but the student is only allowed 2 s.h. of this credit toward total hours for graduation. Credit for music ensembles can be repeated multiple times with a maximum allowed toward total hours for graduation.

Credit in practicum, cooperative education, special topics, independent studies/reading, and other such courses without duplicative content can be repeated for credit; some have limits, others do not.

Depending on subject matter, some courses listed as repeatable in our catalog and only those courses are considered repeatable.

Directed Studies may be repeated up to 8 semester hours.

Directed study courses that use the same course prefix and number, or courses with current event topics that use the same course prefix and number.

each term

ENG151 - Topics in Literature
ENG151 - Topics in Literature

Enrollment in an ensemble, college chapel program, applied study in music, internships, theatre practica
ensembles and private lessons

Examples may include practica, internships, music lessons

Field Work
For the grade point average recalculation policy to apply, a student must declare to his or her college the intent to repeat a course for a change of grade. Students must submit this request to their college before the end of the official add/drop period, no later than the second Friday of the fall and spring semesters, the first Wednesday of Summer Session 1, or the first Friday of Summer Session 2. The course must be repeated within three semesters of the receipt of the original grade, and it must be taken at UIC. Only one registration for the course counts toward the total number of credits required for graduation.

Generally with dance students who may place into a higher level class as Freshman (i.e., should take Ballet 1 but tests into Ballet 4) then they can repeat the higher level classes for credit.

Honors Thesis work may be repeated up to 8 semester hours."

If approved by university courses and curriculum committee

If approved through the curriculum process as repeatable for credit.

If during the course approval process the school submits the course as "repeatable for credit" students can take the course more than once for degree credit.

If the course is approved through curriculum as repeatable for credit.

If this also means "duplicate " credit then some classes are variable credit e.g., 1-6 and so student could take 4 credits one term, 2 credits another term.

Implementation

Important Note: Grade point average recalculation for a repeated course is not automatic. The student must initiate a request in the college office as outlined below.

In Theatre we have performance courses that are associated with new productions and the student may repeat those courses for credit. We have Music courses that are treated in the same manner for students in the Music major.

Independent Studies

Independent studies^7

Individual Instruction Music Classes

Internship courses may be repeated for credit (max of 3 units of credit may be earned through internships)."

Internship or special topic courses.

Internships

Internships or acting course that are continuous or may occur during different times in a student's academic career

Internships, Fieldwork, Activity Courses (Music, Sports) Selected Topic courses

Internships, independent studies, music lessons, band, choir and orchestra.

Internships, private music study, research courses, directed study.

Internships, special topics courses where the topic varies, music performance courses, activity courses

Internships, special topics, independent studies, workshops, music ensembles, music instruction, and other situations where course content differs from term to term.

It is indicated in the course description if a course may be repeated for credit, typically in courses where the topics may vary.

Most courses cannot be repeated for credit. Some courses, however, are defined as repeatable up to a certain number of credits. i.e. research, special topics, internship, etc.

Music and physical education courses"

Music ensembles may be repeated up to 8 semester hours.

Music ensembles, music lessons, internships, research, some senior capstones which go over two semesters

Music labs, art labs, and Phys Ed activity courses are allowed to be repeated for credit.

Music lessons may be repeated up to 8 semester hours.

Music Lessons, Voice Lessons, Choir and Theater Production courses may be repeated for credit.

Music performance courses

Music performance, some studio art classes, and health/human performance (P.E.) courses
Must be approved prior to publishing in the catalog. Approval required of school dean and the university curriculum committee. Topics covered should vary between sections of the course offering.

<table>
<thead>
<tr>
<th>None. Some programs may not allow course repeat in their programs</th>
</tr>
</thead>
<tbody>
<tr>
<td>on a continuing basis, where the course number remains the same, but the course content differs</td>
</tr>
<tr>
<td>One of our graduate degree programs requires a quarterly seminar. We allow it to be repeated for credit multiple times, because it involves discussions on different issues each time.</td>

</tbody>
</table>
Some courses may be repeated for credit under special circumstances.

Some independent study, research, or special topics courses may be repeated. Typically the content of each course is different so the course may have the same number but a different title.

Some music courses at various levels, some independent studies or topics courses when topics vary.

Some of our education courses can be repeated for additional credit.

Some special topics and seminar courses have subject matter that changes from term to term.

Special topic courses that have different course content but same course number. Research, thesis, dissertation.

special topic courses

Special Topic Courses, activity courses, applied visual/performing arts courses

Special Topics

Special Topics course (subject matter varies), individual instruction in music, activity course in PE

Special Topics courses

Special Topics courses (have the same course number but offered with a different topic is a given semester).

Special topics courses (where topic changes), music ensembles, music lessons, independent study & internship (if project is different)

Special topics courses can be repeated for credit as long as the topics are different. Varsity Athletics and Band can be repeated for credit but there is a limit on the number of credits that will be accepted towards the degree. In some schools Independent Studies and Internships can be repeated.

Special topics courses can be taken more than once for credit as long as the topic is different.

Special topics courses may be repeated for credit as long as the course content is different.

Special Topics courses only; when the title and subject matter are different than the previous iteration of the course.

Special topics courses that are not part of regular offerings are given a course number 299. More than one 299 course can be taken as an elective and used for credit.

Special topics courses that have a different topic; performance groups such as choir, orchestra, traveling dramatic troupe; physical activities courses can be taken twice for credit

Special Topics courses that have varying subjects, applied music courses and internships.

Special Topics courses that offer different topics; music lessons; musical group courses.

Special topics courses when the topics of each occurrence are different.

Special Topics courses where the content / subject matter differs significantly from previously taken topics.

Special topics courses where the topic varies.

Special topics courses, directed readings and independent studies may be repeated because the topic varies.

Special Topics courses, Internships, Co-ops

Special topics courses, internships, practicum

Special Topics Courses, Music courses, Art Studio courses, Internships

Special Topics courses, practicums, internships, music lessons, and other similar courses that will have different content or additional work that would warrant the additional credit. We don’t have any ‘regular’ classes that we would allow to be repeated for credit though.

Special topics courses, research, thesis, independent study

special topics or physical education courses

Special Topics with different topic, Internships, Music ensembles and applied music.

Special topics, Certain music courses

Special topics, internships, practicum, experiential learning, cultural enrichment. Must be defined in academic catalog as repeatable for credit.

Stated in the catalog, generally classes with selected topics, that change each semester.

student may need higher grade for a prerequisite or transfer

Student may repeat a course three times.
students can repeat a course twice, the third time needs to be approved by the Director of Advising.

Students may present only 6 repeated courses for graduation."

Students may repeat a course to increase their knowledge of the subject matter. There are circumstances under which repeating a course is advisable and to a student’s advantage. There are also circumstances where repeating a course may disadvantage a student and narrow a student’s options. Some colleges require students to discuss any plan to repeat a course with their academic advisor before they register to repeat the course.

Students may repeat any course. The course shall not appear no more than 3 times on the transcript.

Students may repeat courses for credit when the course is a topics course and the topics are different; independent study coursework.

Students may request to repeat up to 15 credit hours be "repeated." Only a second attempt taken at our campus may replace the first take, if requested. It must be a C- or lower original grade to be replaced in the GPA and credit hours. Otherwise, they may repeat and have it count, but it will be averaged in as if it was a different course.

Students with permission to repeat a course a second time are to obtain a Registration Clearance Permit from their advisor and bring it to the Registrar Service Center.

Studio, ensemble, some required performance-based courses

The College offers project-based courses that may be repeated for credit as they may take more than one semester to complete project.

The course is a special topics or activity course.

The new Repeating a Course and GPA Recalculation policies apply to all undergraduate students entering UIC in Fall 2009 or later. Continuing students who entered UIC before Fall 2009 may select one of two options. They may either follow the old Grade Forgiveness policy found under University Degree Requirements in the Undergraduate Catalog in effect at the time of their admission to UIC. Or, they may follow the new Repeating a Course and GPA Recalculation policies. Continuing students cannot follow both policies. The Repeating a Course and GPA Recalculation policies can be applied only to courses taken after the policies took effect, i.e. to courses taken during the Fall 2009 term or later. For example, because the Repeating a Course and GPA Recalculation policies took effect in Fall 2009, Spring 2010 graded courses will be the first opportunity students will have to retake and exclude a Fall 2009 course from their GPA.

There are a few courses that may be repeated for credit, such as Co-op courses, clinicals, internships, special topics. But these courses are the exceptions. Most courses cannot be repeated for credit.

These courses are primarily in Performing Arts, where certain majors require a minimum and maximum number of credits - private music lessons, ensembles, etc. Course repeating must be stated in the catalog as part of the course description.

Three times after the first attempt. W's and Y's are not considered attempts.

To get a better grade

To repeat a course more than once requires written permission from the student’s college dean. Students who have been dismissed may not appeal on the grounds of intention to repeat courses. Certain courses may not be repeated; students should consult their college before repeating a course.

Topic course that the subject changes.

Topic: Early Literature Readings

Topic: Poetry in Literature"

Topical courses which have the same course number but cover different subject matter based on instructor and time of offering.

Topical courses, independent research, internships, music, performance and studio courses are repeatable as long as the topics differ or work/sire is different.

Topics course numbers may be repeated for credit provided the topics are different each attempt. Some independent study, directed study, internship, or practicum courses may be repeated as deemed appropriate by the program chair.

Topics courses (different topics); practicum/internship; some capstone classes

Topics courses may be repeated with different topics.

Appendix H: Conditions for Repeating a Graduate and/or Professional Course*

*The table includes data as submitted by the respondents

<table>
<thead>
<tr>
<th>1. Clinical courses; 2. Rotating syllabus</th>
</tr>
</thead>
<tbody>
<tr>
<td>A clinical course might be repeated.</td>
</tr>
<tr>
<td>A course can count toward their major and their minor.</td>
</tr>
<tr>
<td>A course is defined as 'allowed for repeat' by academics; these are typically topics courses that change from semester to semester.</td>
</tr>
<tr>
<td>A selected topics, directed studies, or experiential course where the topics covered are different than the first time the course was taken may be repeated.</td>
</tr>
<tr>
<td>A sports course (Football, basketball, etc.), a Music course (Private lessons, etc.), courses that specify in the catalog that they may be repeated for credit (some science lab courses).</td>
</tr>
<tr>
<td>A student can repeat a course twice to improve a D or an F. If the student repeats a course twice, the second and third grades are averaged.</td>
</tr>
<tr>
<td>A student may repeat any course as desired. However, advisement is given in terms of whether or not the repeat would be covered by financial aid or not.</td>
</tr>
<tr>
<td>A topics course may be repeated for credit, or practicum, internship, etc.</td>
</tr>
<tr>
<td>A WFU course can be repeated at WFU if the grade earned is C- or lower. In this case, all grades received will appear on the transcript, but the course will be counted only one time for credit.</td>
</tr>
<tr>
<td>Accreditation requires course to be taken each semester for 8 semesters. For example, music ensembles or music lessons.</td>
</tr>
<tr>
<td>activity classes, topic-based classes, studios, and the like</td>
</tr>
<tr>
<td>activity courses</td>
</tr>
<tr>
<td>activity courses such as choir, ensemble, or theater practicum</td>
</tr>
<tr>
<td>An Applied music lesson, a PE course</td>
</tr>
<tr>
<td>Any course, except for Independent Study, may be repeated up to two times at the graduate level. The last grade and credit hours at the institution will completely replace the previous grade and credit hours in computing the grade point average, although the earlier record remains a part of the student's transcript. A grade of A through E must be earned in a repeat course to replace the previous grade in computing the average.</td>
</tr>
<tr>
<td>Any student wishing to repeat a course in which he or she earned a grade of D may do so by contacting his or her Academic Advisor. Students who are receiving financial aid or participating in intercollegiate athletics should consult with the Athletic Representative in the Financial Aid Office before repeating a course with a D grade. A student who has earned a minimum of 75 hours toward the Bachelor’s degree and whose cumulative point average in their major courses is less than 2.50 may repeat a course in the major for which a grade of a C or less was earned. Such students must obtain permission from their Academic Advisor before repeating the course in question and contact the Financial Aid Office. Both grades, original and repeated, appear on the permanent academic record, but only the higher one is counted in the grade point average and in meeting graduation requirements.</td>
</tr>
<tr>
<td>Applied music lessons, internships and &quot;Topics&quot; courses are all repeatable for credit.</td>
</tr>
<tr>
<td>Applied study such as music lessons or theatre activities. Topics coursework when topics are different.</td>
</tr>
<tr>
<td>As established by the curriculum and noted in the course catalog. Classes such as physical activity, music, theater, variable topics classes, etc.</td>
</tr>
<tr>
<td>as indicated in course description</td>
</tr>
<tr>
<td>As noted under a Cumulative Grade Average, graduate students are expected to maintain a minimum GPA of 3.0.</td>
</tr>
<tr>
<td>Certain seminar courses are repeated quarterly as part of program requirements. We would not let a student opt to repeat a course for credit that would not normally be repeatable.</td>
</tr>
<tr>
<td>Clinic courses require more than one term of enrollment as do thesis/dissertation research. Some students enroll in research electives on different topics and earn credit more than once.</td>
</tr>
<tr>
<td>Clinical rotations, independent study</td>
</tr>
</tbody>
</table>

205
Course is a topics, dissertation, thesis, internship or independent study type.

Course must be approved to be repeated for credit.

Courses designated as repeatable may be repeated for earned credit. Courses such as thesis or special topics may be repeated.

courses may be a requirement for another graduate program offered at the school

Courses must be approved in the faculty governance process for oversight of the curriculum.

Courses must indicate how many times they may be repeated.

Courses such as music studio are required more than once.

Courses that are specifically approved for repeat credit with change of topic, or required for multiple terms to fulfill degree requirements. These course descriptions are annotated as being eligible for repeat credit, the number of times they can be repeated, and the conditions under which the repeat will be approved.

Courses with multiple topics or unique experiences.

Currently, we allow students to repeat the course as often as they want to achieve the grade they desire. We are considering changing that policy to a maximum of three attempts.

Department offer topics courses in which the course content is different from term to term.

Designated courses that have a different topic or focus may be repeated. Or special courses required for concentration (i.e., music lessons).

Different topic for special topics course, internship credit, research credit, instrumental music and vocal music lessons courses.

Directed studies and other like courses may be taken more than once given their nature.

dissertation
dissertation courses

Dissertation, Research, internships

Examples may include courses such as private music lessons, choir or band participation, music repertoire, and some internships.

faculty sponsored research, independent studies

failed courses and "D" graded courses

Fieldwork, Continuous Matriculation,

For graduate programs anything less than a B may be repeated once. Additional repeats require petition and Vice-President for Academic Affairs approval.

If approved that way by the faculty when the course is created.

If earns a D or less in a course, they can repeat it. However, we have some courses that are "repeatable" i.e., Music etc.

If it’s a topics course.

If it's a variable unit course, the student can repeat it up to the maximum allowable units.

If student received a D or F grade, they may repeat.

If subject matter of one offering is substantially different than the previous time taken

If the catalog descriptions allows for it. Examples include private music lessons, some research courses.

If the course was approved in the catalog as repeatable.

If the course was established as a course that could be repeated for credit when it was approved.

If the program requires a highest grade for the course.

If the standing grade is C- or lower.

If the student has still no achieved the needed letter grade. Typically a C grade is needed.

If these are a series of practicums or dissertation courses.

Independent Studies, Music Applied Lessons, PE Activity courses, Internships, Topics courses

Independent study courses.

Internship where the second internship is different (company, experience, etc.) from the first internship.

Internship, practicum, and project courses may be repeated for credit (different learning experiences each time student is enrolled).
Internships (up to two), workshops, seminars, special topics courses with different topics, music ensembles and applied music courses.

Internships and independent studies (limit of 6 career credits, requires chair approval), advanced seminar courses (limit of one repeat/6 career credits, requires advisor approval). In rare instances, the VPAA will approve a repeat that doesn’t fall into these categories if the faculty member and content are different for the second instance (example: a different client project for an advertising course).

Internships that span more than one semester are entered as multiple, repeatable courses.

Internships which have a maximum number of credits applicable towards the degree but the students can register for the number of credits they want in a particular semester depending upon their credit load.

Internships, co-ops, thesis, dissertation, multiple topic courses

Internships, practicum, service learning

It is a special topics, special problems, thesis hours, seminar or other kind of course where the content changes or similar to thesis hours where the work continues for several terms.

It’s on a case-by-case basis at the discretion of the professional/graduate school or program.

Music courses may be taken more than once for credit.

Music courses; some fitness courses

Music ensembles and some applied music lessons

Music lessons or ensemble in the Masters of Music Education. Special topic courses but the topics cannot be the same.

musical ensembles, special topics courses that change each semester

Only if approved by the Curriculum Committee as a course eligible to be repeated with maximum of credit hours.

Physical Education, Seminars with different subjects/titles, Workshops with different subjects/titles, Practicums, Internships, Student Teaching

practical training/internships

Practicum

Practicum or special topics courses with different topics.

previous course did not earn subject credit

readings and research

Repeatable courses like physical education, music ensembles, etc.

Repeatable for the major. Most commonly applied music or ensemble courses.

Repeats of C or F grades are not automatic and require the permission of the Graduate Dean.

Research (same or different topic) and special topics or independent study courses when content is different. Each have total maximum credit limits

Research courses, special topics courses (with different topics), independent studies and dissertation/thesis supervision courses are allowed multiple times.

research"

Riding courses, instructional voice & piano, creative writing, internships, etc.

same course number and title but different instructor or content

Selected topic courses as well as some Music and Art courses can be repeated for credit.

Selected Topic"

Seminars are required each term a student is enrolled in certain programs, therefore the same course is repeated for the duration of the program.

Some course numbers are reused for topical courses. For example: BDOC 5555 Seminar in Theology: Trinity may be offered one year, and the next year BDOC 5555 Seminar in Theology: Christology might be offered. In the catalog it is listed as one course, but in reality it could be a different course each time. (A student could not re-take the same topic for credit, however.)

Some courses are offered under a "Topics" number (e.g. 290) that may be repeated with different topics. Some courses are repeatable by design (e.g. music lessons, varsity athletics).
Some courses have max number of credits they can be repeated for towards a degree. Best example is music ensembles, choir or lessons. A student can take course a 1 credit course up to 8-12 times in some cases before they reach a maximum number of credits. Often these credits fulfill elective credits towards a major or degree.

Some departmental courses are repeatable and students can take based on the number attempts allowable. These would appear on the record, earn credits and be included in the GPA.

Some experiential courses can be repeated for credit. It is a very small number of courses.

Some graduate courses can be repeated for credit. Other graduate courses can be repeated to get a better grade BUT both grades appear on the transcript and one does not replace the other. Students cannot submit a request/appeal to have the original grade replaced with a repeated grade (there wasn’t this option on a previous question).

Some of our courses have the same Course ID, but the Content/Topics are different. If the course content is different, the course may be counted twice. Generally speaking this only applies to program elective courses.

Some programs offer topics courses which may be taken multiple times with different topics/content. Special Topic Courses, Applied Visual and Performing Arts courses, Varsity Athletics courses, and Physical Activity courses.

Special topics

Special Topics and field work/internship type courses.

Special Topics and internships and other classes that can be taken multiple times.

Special topics courses have the same number so appear as repeats. They are different topics though, so students get new content each semester.

Special Topics courses where the topic offered is different each semester.

Special Topics courses with the same course number but different subject matter may be repeated; some graduate project/thesis/dissertation courses may be repeated for credit as well.

Special Topics courses within each department carry the same number. A student could take two or more special topics class within a single department, therefore repeating the same course number.

Special topics courses, internships, studio courses

special topics etc.

Special topics with varying topics. Some applied music courses. Research or thesis hours.

special topics"

Special Topics, Dissertation, Research, a course in which a grade of C or lower was earned is required to be repeated, Clinical Courses, etc.

Special Topics, Independent Study, Workshops, etc.

Special topics, internship, thesis, research

Special topics, music performance, internships, independent studies, directed research.

Special topics, practicums, dissertation preparation.

Specializations students earn, they can use one course in one specialization and in another, but only in the specialization category.

Student pursuing two programs may use the same course towards both programs within a maximum limit.

Student would like to earn a higher grade.

Students are only allowed to retake courses when the content of the course is different the second time and would build or advance a student’s skill in a specific area.

Students do not have any conditions

Students may retake any course in which they received a final grade of F. A required course with a final grade of F must be repeated. Students receiving a D in a required course in which a grade of C or better is needed in order to move on must retake that class.
Students must submit a request to the registrar. If a student is wanting to improve their GPA, normally permission is granted for a repeat course.

Study abroad, independent studies
The course may be repeated 3 times

The course must be approved for credit by the Registrar and be designated as "repeatable for credit"

The course must be designated as repeatable for credit by the curriculum committee and approved by the dean. These courses are generally required for degree program completion.

The course must be designated by the Academic Senate as being repeatable for credit. This is very common for research courses and for courses whose topics change from quarter to quarter (often referred to as "special topics").

The course must be established as repeatable in the catalog. Examples of repeatable courses are choir, orchestra, performance ensembles, private instrumental/voice music lessons, special topics course (as long as the topic is different), internships with a limit on maximum hours earned.

The course must go through the curriculum process in advance of the student repeating it for credit and a limit is normally placed on the allowable number of repeats or the number of credits.

The courses must be submitted indicating the courses is approved by the appropriate curriculum committee or College Dean to be repeated. Fieldwork is an example of a graduate courses that may be repeated.

The institution allows the student to Repeat a Course at their choice. However, some colleges limit the number of times (e.g. twice only) a student may repeat. We are implementing a policy that students repeating a course for a third time will have to seek permission through a petition process.

The number of times a course may be repeated for credit is stated on the course approval.

The verbiage either has to be approved in the catalog or else it needs to be approved later.

There are repeatable courses. Example music classes

Thesis or dissertation courses
This only applies to our developmental writing courses (at the pre-Expository Writing level). These may be taken twice for credit, on the recommendation of the instructor and only with a satisfactory performance in the first semester.

This would only be for umbrella courses in which the topic of the course changes.

Those course approved for repeatable credit. For example Special Topic courses.

To pass a grade which minimum passing grade is C or B in some cases

To receive a better grade.

Topic courses, music ensembles/lessons, internships, independent studies

Topical courses

Topics classes provided they have different content/titles, performance (dance and music), program specific when the content differs for the same course title.

Topics courses

Topics courses - same subject and course number but different topics each term.

Topics courses (with different topics)

Topics courses have the same course number but different content

Topics courses where the content rotates may be repeated when the focus of the course differs.

Topics courses where the course prefix and number may remain the same but the topic of the course may change.

Usually they are internships or dissertations, or if the subject matter changes term to term.

Variable topics; dissertation.

Various, pe, seminars, special topics, etc.

We are a music school and students take private lessons each semester. Four of the eight semesters are taken as APP150 and four are taken as APP350.
We have advanced topic courses that can be repeated with different topics; we have practicum/training credits that are designed to be taken multiple times to earn the minimum credits required.

We have courses that are called "Special Topics" that can be repeated as the topics for the class change. Also, all music lessons and ensembles may be repeated.

When the discipline curriculum dictates (e.g. practicum, field experience x2)

When the topic/content significantly changes (i.e. specific topics courses that use the same course number).

Your description of repeated grades did not cover our instance - both grades apply to GPA, only one set of credits counts"
Appendix I: Other Conditions for Undergraduate Academic Bankruptcy or Forgiveness*

</tbody>
</table>

CNU students who have been readmitted after not taking courses at CNU for a period of five or more years may apply to the University Registrar for academic forgiveness. The student must be currently enrolled at CNU and have completed at least 12 credit hours with a minimum 2.00 grade point average. The University Registrar will act on behalf of the Academic Status Committee to have the past academic record at CNU forgiven. The forgiveness policy applies to the entire academic record prior to readmission and not to selected courses. The record of forgiven courses will remain on the student’s permanent record, but it will be noted that these courses have been forgiven. Such forgiven courses will not fulfill any academic requirements nor will they be computed in the cumulative grade point average.

<thead>
<tr>
<th>Courses D or less and 5 years or older</th>
</tr>
</thead>
<tbody>
<tr>
<td>Courses must be at least 5 years old and student must have successfully completed at least 12 credit hours since courses were taken</td>
</tr>
<tr>
<td>Demonstrate maturity and ability to succeed academically</td>
</tr>
<tr>
<td>Did not attend for 4 yrs. and obtains a 2.0 on 12 credits upon return.</td>
</tr>
<tr>
<td>Documentation from court.</td>
</tr>
<tr>
<td>Earned a minimum of 12 UG level credits at 2.00 GPA upon returning to school after 3+ year break</td>
</tr>
<tr>
<td>Earned a specific number of credits at a 2.65 GPA</td>
</tr>
<tr>
<td>Extenuating circumstances; they are only eligible 1x</td>
</tr>
<tr>
<td>Five years after the semester in question and in good academic standing.</td>
</tr>
<tr>
<td>Grades must be 10 years old and student must have returned and successfully completed 1 term.</td>
</tr>
<tr>
<td>has honorably served in the U.S. armed services for at least 2 years since receiving the failing grades</td>
</tr>
<tr>
<td>If a student retakes a failed course and passes the retake, then the failed grade is “forgiven” and does not affect the GPA.</td>
</tr>
<tr>
<td>If student’s GPA is such that it is mathematically impossible to receive the minimum passing GPA for graduation</td>
</tr>
<tr>
<td>If the term(s) they wish to have forgiven are 5 or more years ago. We call this Academic Renewal. All grades from a given term (or more than one) are removed from the grade point average calculations, but the original course, credit and letter grade data remains on the transcript)</td>
</tr>
<tr>
<td>In a new academic program and in good standing in that program.</td>
</tr>
<tr>
<td>Internal Transfer from one major to another removes the first majors poor grades from the GPA</td>
</tr>
<tr>
<td>Left this school in poor academic standing and have either been away for 2 years or earned at least 24 credits at another school.</td>
</tr>
<tr>
<td>less than 2.00 GPA</td>
</tr>
<tr>
<td>May have 30 units forgiven if they have completed 30 units after the semester of forgiveness with a GPA of 2.5</td>
</tr>
<tr>
<td>Meet the requirements set by the State Regents for Higher Education.</td>
</tr>
<tr>
<td>met with, applied to, and had a dean approve</td>
</tr>
<tr>
<td>Must apply for Academic Forgiveness in first term at ADU. Once approved, all past work at other institutions is removed and students starts over at ADU.</td>
</tr>
<tr>
<td>Must have earned 12 hrs. with a 2.0 at our school in the past 2 years to be eligible for academic renewal. All coursework five years old or older can be excluded through academic renewal. Grade are not changed on the transcript though. So all this does is allow a manual recalculation of GPA for the purpose of graduation or application to a selective program at the institution.</td>
</tr>
<tr>
<td>Not attended in 4 years, 2.5 GPA after returning, be matriculated</td>
</tr>
<tr>
<td>Not been previously approved by this institution (e.g. second or subsequent request)</td>
</tr>
<tr>
<td>not have earned a baccalaureate degree; not have been granted previously</td>
</tr>
<tr>
<td>Not sure if this counts. If you change majors we will remove grades of courses that do not apply to that major (that are specific to the previous major). E.g. you were bio but are now art, we will remove the art grades.</td>
</tr>
<tr>
<td>One calendar year has passed, all grades earned for the term are excluded regardless of grade, may choose one single term or first two terms neither to exceed 18 total credits</td>
</tr>
<tr>
<td>One time basis, all academic work older than 10 years is removed/forgiven from their academic record. Students are not allowed to choose which courses to be forgiven. All course grades older than 10 year are forgiven, no matter the grade.</td>
</tr>
<tr>
<td>Only available to first-year students whose GPA is below 2.00 in their first or second semester. They can have up to 3 “F” grades converted to No-Pass grades (that do not impact the GPA)</td>
</tr>
<tr>
<td>Only Doctor of Chiropractic are eligible</td>
</tr>
<tr>
<td>only for academic standing</td>
</tr>
<tr>
<td>Petition along with a rationale for a changed approach.</td>
</tr>
<tr>
<td>Re-admitting after academic dismissal</td>
</tr>
</tbody>
</table>
Reprieve: 3 yrs. have passed, 12 hours earned with no grade lower than a C. Renewal: 5 years have passed, 12 hours earned, no grade lower than a C.

Returned and completed 12 credit hours with a minimum GPA of 2.5.

returned to the college and earned 12 credit hours in good standing

set out a period of time and returned with certain GPA

State of Texas Academic Fresh Start policy, must be a resident of Texas and the grades must be over 10 years old that are not considered. (very general not detailed description here)

student can forgive (replace) a grade or forgive a term

Students are eligible for Freshman Forgiveness for courses taken in residence in degree seeking programs within the first 30 attempted credits. Transfer students are not eligible for Freshman Forgiveness.

Students must petition and be approved. Record is fully reviewed prior to approval being granted.

Students on a LOA who earn an AAS degree with a GPA > 3.0 and are readmitted to complete the BS degree.

Students who are returning to the University of Missouri-Columbia to pursue an undergraduate degree after an extended absence may request permission to remove one or more of the complete academic terms from future degree and GPA considerations. A. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements: 1.Students must not have enrolled as degree-seeking at the University of Missouri-Columbia or any other University of Missouri System campus for four or more consecutive years. 2.Students must not have graduated from the University of Missouri-Columbia. 3.Students must either: a.Be admitted as degree-seeking and have earned a minimum of 12.0 credit hours with at least a 2.5 GPA of record for those hours at the University of Missouri-Columbia within the past 12 months; or b. Have attended as a non-degree-seeking student and have earned thereby a minimum of 12.0 credit hours with at least a 2.5 GPA of record for those hours at the University of Missouri-Columbia within the past 12 months and subsequently have been admitted as degree-seeking by the University. B. Conditions. Academic renewal is based on the following conditions: 1.All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student's academic record. 2.Renewal may be applied only to academic terms completed prior to the student’s extended absence. 3.Students may be granted only one academic renewal. 4.Students who choose academic renewal must meet the degree requirements of the University of Missouri-Columbia undergraduate catalog at the time of their readmission. 5.Degree requirements met during the dropped terms will have to be repeated. 6.To be eligible for a degree, students must complete a minimum of 24 credit hours at the University of Missouri-Columbia after the granting of academic renewal. C. Procedures 1.Students should discuss their desire to pursue academic renewal with an Academic Adviser in the college they wish to enter. 2.Students should submit an application for academic renewal to the Office of the University Registrar. 3.For each term approved for academic renewal, a note will appear on the transcript.

Texas Academic Fresh Start Policy

The "renewal" or "forgiveness" is limited to a maximum of two semesters and the approved policy action removes earned hours, quality hours and quality points (grade points) for the entire semester. No partial deletion of any course work within any semester, nor after the degree has been awarded.

the student must have left with a GPA lower than 2.0 as well

They are allowed to exclude three repeated courses from calculation of the GPA.

They have to apply

Transferring between colleges

Undergraduate - credits more than 10 years old may be forgiven. Graduates - credits from a previous incomplete program if satisfactory performance is achieved in a new program

Upon return, as full-time student must have attained a 2.00 grade point average for all work attempted in the first semester, or upon completion of the first 12 semester credits, if part-time.

Waiting period of two years (not affected by attendance)

were on academic probation or dismissal at the end of their last term at our institution

Withdraw on Probation, then return years later
Appendix J: Conditions for non-Latin Honors*

*The table includes data as submitted by the respondents

- Lifetime Dean's List - at least 3 semesters with 3.0 or above GPA in at least 10 units.
- Distinction = 3.8 or better
- Honors = 3.5 or better
- Graduates whose minimum GPAs are 3.9 and who complete at least 60 credit hours are graduated with highest distinction; those whose minimum GPAs are 3.8 and who complete at least 60 credit hours on campus are graduated with high distinction; and those whose minimum GPAs are 3.65 and who complete at least 60 credit hours on campus are graduated with distinction.
- President's honors students graduate with a 4.0 GPA and earn at least 25% of the degree with our institution.
- Cumulative grade point average of 3.7 or higher
- Dean's list: 3.5 or higher and in degree (not certificate) program.
- President's Honor Medal: 4.0 and in degree (not certificate)
- The student must have a minimum of 32 hours with a 3.80 GPA from our institution.
- Institutional Honors College -- student must apply, be accepted, maintain academic standards, and complete a set curriculum.
- Honors College General Honors notation = 21 hours of approved, graded honors credits w/ at least 2 of these being 3-credit hour HON-H courses; approved honors courses from other departments limited to two courses from any one dept.; max of 6 credits overseas studies; 3.4 GPA for 21 credit hours w/ no course grade lower than C (all must carry letter grade) and cum of 3.4 at time of graduation
- School Honors in Schools of Business = 3.5 cum GPA, 9 hrs. honors courses freshman/ sophomore years, attendance at 5 honors events (at least one per semester), Honors I-Core completion, internship or study abroad
- School Honors is Music = 3.5 cumulative GPA, 300-level seminar and 400-level project w/ grade of B or higher
- School Honors in Nursing = 3.3 cum or Nursing GPA, 3.5 GPA in Nursing honors courses. 300-level honors proposal and 400-level honors research courses, thesis/article for publication
- School Honors in Public & Environmental Affairs = 3.5 cum GPA, written and defended honors thesis; three honors-level school courses in specific major
- Departmental Honors within the College of Arts and Sciences = within major department 3.3 cum GPA, completion of 300-level seminar, written and defended honors thesis under direction of faculty advisor
- Chancellor's Honor - Student must earned a cumulative GPA of at least 3.8.
- "Presidential Honors Cumulative GPA 3.8 and higher
- Vice Presidential Honors cumulative GPA 3.5 - 3.79"
- Dean’s List, President’s List, Academic Citation
- "3.50-3.69- Honors
- 3.70-3.99- Dean’s
- 4.00 President's
- President's List - 4.00 GPA
- Dean's List - 3.50 or higher"
